SUBJECT: Transmittal of Camps Requisition SP-85 (Food Items for
4th Quarter 1945 for United Nations' D.P.'s in Italy)

Submitted herewith are 10 copies of our Requisition SP-85 for Food Division items for use in the 4th Quarter of 1945 in Camps for United Nations Displaced Persons in Italy.

As mentioned under "General Notes" on the cover sheet, the quantities requested in this Requisition (SP-85) represent the increase necessary over the current Food Division program for D.P. Camps in Italy in order to provide for 75,000 persons which is the population estimate given in Rome's cable 599. The current Food Division program, which is the second half of the requests under Rome's cable 257, Camps' Requisition C-66, provides for a population of only 30,000 persons, the quantities being taken from Camps Requisition CAE-38. For reference a table is attached showing the three sets of figures involved.

It should be noted that Requisition SP-80 which was intended as an interim request, is being cancelled concurrently with the issue of Requisition SP-85.

Since shipments of 3rd Quarter requests fell so far short of requirements, it is urged that every effort be made to fill 4th Quarter requests promptly.
