MEMORANDUM

TO: Miss Gay Shepperson
FROM: Dr. A. Hughes Bryan *A.H.B.*
SUBJECT: Artificial Limb Project for Greece

Following our conference with Colonel Shands yesterday, the Colonel called me today to say that he had discussed his assignment to UNRRA by the Army with General Grant, the Air Surgeon, and General Grant stated that he would be disposed to recommend such an assignment.

General Grant stated that our letter requesting Colonel Shands' assignment should be addressed to the Secretary of War as follows: The Honorable Henry L. Stimson, The Secretary of War, Pentagon Building. Our letter should state our need for the temporary services of Colonel Alfred R. Shands of the Office of the Air Surgeon for a six-weeks' assignment in Greece, and we should outline the purpose of the assignment and the duties he would carry out there, namely, to survey the situation in reference to *especially* crippled children and to make recommendations as to the provision of artificial limbs and the training of Greek personnel in the manufacture, fitting and adjustment of these artificial appliances. Colonel Shands believes that six weeks would be a sufficiently long period for this assignment.

I discussed the matter with Dr. Crabtree this morning and he feels that before requesting Colonel Shands' services, we should, first, clear the matter with our Greek Mission and, second, discuss the matter with the Near East Foundation since they are the organization which was originally interested in this project. As a matter of fact, the Near East Foundation deferred hiring an orthopedic surgeon at Dr. Crabtree's suggestion.

Colonel Shands will be away from Washington during the week of 23 July and would be able to make arrangements for his trip to Greece if proper clearances were obtained by the 1st of August. Colonel Shands' telephone number in the War Department is extension 72008.

Correspondence regarding
training of limb and brace makers.

Washington 25, D. C.

Dear Miss Greve:

*copy mailed to
Miss Greve
10-2-45*

It was so nice having you and Mr. Chang here for lunch and talk over your situation. I have already found out from Colonel Peterson in the Surgeon General's Office that he thinks the Army will be delighted to have Chinese students in the prostheses shops in the amputation centers. I can see no objection whatsoever to this. I also found out that the Mayo Clinic will be delighted to have Chinese students in their brace shops. I will make you up a list of places for brace making training. This may take a little while as I think the various shops should be written to first.

Looking forward to the pleasure of seeing you when you return in February, I am

Sincerely yours,

A. R. Shands, Jr.

UNRRA MAIL ROOM

UNRRA MAIL ROOM

1 January 1945

Lt. Col. Alfred R. Shands, Jr.
Office of the Air Surgeon
Pentagon Building
Washington, D.C.

My dear Colonel Shands:

Mr. Chang and I are deeply indebted to you for taking time from your very busy day to hear and discuss our problems. We shall want to talk with you soon again. I shall be in Cleveland in January, but hope to be back in the UNRRA office in February.

In the meantime, if you could help in finding places for Chinese students to study brace and artificial leg making, our office would be most grateful. UNRRA is considering the development of Rehabilitation Centers in China, in which one division will be the finishing and manufacturing of braces and appliances.

The plan calls for the training of staff in the United States and other nations where there are training facilities, and later the opening of training facilities in China. We hope staff can be in training during the time plans are being made and the Center established so that some will be ready when the Centers are opened.

Again, our thanks to you.

Sincerely yours,

Bell Greve

Supply 20

Dear Miss Greve:

Thank you for your letter of December 27 to Dr. Dean A. Clark.

Unfortunately we do not have a list of institutions or shops where opportunities for training brace makers and artificial appliance makers can be obtained. As you are undoubtedly aware, the supply of brace makers in this country is extremely limited at the present time and this problem has been the subject of joint discussions between our agency and the Children's Bureau. Some hospitals have found it necessary to install their own brace shops in order to insure a satisfactory and economical supply. I do not know but what it may eventually be possible to enlist the cooperation of such hospitals in offering apprenticeships to candidates for training in this special field. With regard to the problem of training for artificial limb makers, you are, of course, familiar with the training facilities of the prominent manufacturers and the New York Institute for the Crippled and Disabled. The great demand for artificial limbs in this country and in foreign countries will probably result in a considerable expansion of production facilities soon in this country.

I shall be glad to discuss these problems at greater length at your convenience.

Sincerely yours,

J. Masur

27062072. 2011.8

27 December 1944

Dr. Dean Clarke
Bureau of Vocational Rehabilitation
815 Connecticut Avenue
Washington, D.C.

Dear Dr. Clarke:

Miss Copp has probably told you that I am doing some special work with UNRRA in the development of the program for rehabilitation centers in Greece and China. I hope we shall not be too much of a burden to you, and that you will let us come to you often for advice.

At the present moment we are anxious to secure a list of the best places in the United States for training brace makers and artificial appliance makers. I am hoping that you might have an up-to-date list in your office. I know we have need of development in this particular field in our country, but of course we have to work with what we have at the present time.

UNRRA's plans call for the establishment of brace and artificial appliance shops in each of the rehabilitation centers. We hope that students can be sent to the States for training or to Great Britain just as soon as possible so that they would be available for work in their own countries about the time the shops are ready.

Any suggestions that you may have in this matter would be gratefully received.

Sincerely yours,

Bell Greve, Consultant
Welfare Division

THE NATIONAL FOUNDATION FOR INFANTILE PARALYSIS
INCORPORATED

120 BROADWAY

NEW YORK 5, N.Y.

January 8, 1945

BASIL O'CONNOR
PRESIDENT

W
Miss Bell Greve

United Nations Relief and Rehabilitation
Administration
1344 Connecticut Avenue
Washington 25, D. C.

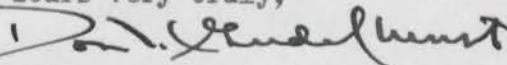

Dear Miss Greve:

The National Foundation has assisted research in countries other than the United States. Our efforts have been minimal and we have no desire at this time to stimulate further work along this line. I am certain you appreciate that a separate staff would be necessary to carry on investigation and follow up in connection with any grant making program that might be developed in this connection.

We have long been concerned with the problems of brace making. Several years ago we made a detailed study of the practices as then carried on in the United States. This report was not published and was not made available to the profession. In substance it showed what we all knew -- that a very bad situation existed. The war, of course, quite effectively put a stop to work along this line, although we have recently re-opened negotiations with one of the universities that may lead to the establishment in the very near future of a training center. These plans, however, are tentative and should not be made public.

The National Foundation is willing to assist carefully selected graduate students from other countries. We would be willing to make available postgraduate training in the field of poliomyelitis for physicians, nurses, and physical therapy technicians. However, at present this program must be kept to a minimum and each case must be handled individually. Our need for providing training for these same workers in this country is so great that we do not feel justified in expanding our efforts in respect to groups from foreign lands.

Yours very truly,

Don W. Gudakunst, M.D.
Medical Director

File 3
2 January 1945

Dr. Don W. Gudakunst
National Foundation for Infantile Paralysis
120 Broadway
New York, N.Y.

My dear Dr. Gudakunst:

At the present time I am helping in the Washington office of the United Nations Relief and Rehabilitation Administration, in the development of a program in China and Greece for the rehabilitation of individuals who are crippled and disabled.

At one time I believe the suggestion was made that the National Foundation had under consideration the development of Research Centers in other parts of the world. May we inquire if such plans have reached a point where they can be discussed with the Welfare Division of UNRRA, particularly for the two nations mentioned above?

We are confronted with the need of training brace makers, and in making a study of the opportunities available in the United States we can find practically nothing. We are informed that the National Foundation recently made a survey of the facilities for manufacturing braces and the training of brace makers in the United States. We should appreciate receiving whatever information is ready for distribution by your office on this matter.

We have also heard that the National Foundation is considering the development of certain training opportunities. We should be pleased to know more about that situation. We are particularly interested in knowing whether students from other nations would be accepted for training, should these schools be developed. Any information, help, suggestions or recommendations which you may care to furnish this office in the matter will be gratefully received.

Sincerely yours,

Ball Greve
Consultant on Rehabilitation
Welfare Division

Mrs. Sally Lucas Jean
Consultant in Health Education
National Foundation for Infantile Paralysis
120 Broadway
New York City, N.Y.

My dear Mrs. Jean:

Thank you for informing us so fully regarding the service which the National Foundation for Infantile Paralysis has given to the medical program in China. A copy of your letter has been given to Mr. Hung-chun Chang, Director of Research and Planning of the Ministry of Social Welfare of the Chinese Government, and a member of the Chinese Delegation to UNRRA for Welfare. No doubt, he will write you later on this same subject.

Since our program for the rehabilitation of the crippled and disabled of China is in process of development, may we wait before sending a specific request regarding the two pamphlets in which we are interested? We wrote in order that we might have on file definite information of what could be expected.

I shall write you again later in the year.

Sincerely yours,

Ball Greve

(2)

Dear Miss Greve:

Your January 3rd letter regarding the utilization of National Foundation foreign language publications has been read with interest. We will gladly supply the number required for the use of UNRRA. As to our preparing copies of "Doctor...What Can I Do?" and "When Polio Strikes" in Chinese is questionable because the Chinese population in the United States who do not read English is too small to warrant our issuing publications for them. We will however consider such a request for the use of UNRRA in China if you will inform us as to the number of copies desired.

Because of my long period of work with educators and health officials in China and my position as an officer of the China Aid Council which deals with child health problems in China, I have had much experience in providing publications to Chinese leaders. Naturally, publications of the National Foundation have been brought to their attention, and a plan was made last spring to supply several reprints of a technical nature which Chinese officials visiting here had selected. These were microfilmed and forwarded by the Office of War Information and sent to five libraries where there are training programs for medical and public health workers. The arrangements for this service were made by Miss Mildred Price, Executive Secretary of the China Aid Council, 1720 Broadway, New York City.

The use of microfilm for books, pamphlets and reports seems the most practical method of furnishing publications to China as shipping difficulties are thus reduced to a minimum. We are in constant contact with Dr. King and Dr. C. K. Chu and naturally forward to them single copies of such publications as they request and keep them on our mailing list.

In the light of these facts perhaps you will want to consider having "Doctor...What Can I Do?" and "When Polio Strikes" microfilmed. I shall anticipate hearing from you further in regard to the matter.

Dear Miss Greve:

Thank you so much for your letter of March 31. I am asking Colonel Rusk to send the pamphlet "Let's Walk" to the names you have sent in.

I have been looking for a call from you regarding the information on places to train workers for brace and prosthetic manufacture. I have talked with a great many people regarding this since our conference. However, I believe it will be well, if the Chinese Government wants this information, to write direct to the National Research Council and it will be referred to their orthopedic committee. I should think that you could get a copy of the transactions of the meeting on artificial appliances which was held in Chicago about February 1, from the National Research Council. Dr. Owen is the one to write to there about it.

I shall be delighted to help in any way that I can and certainly wish you the best of success in your work overseas.

3 January 1945

Dr. George B. Bennett
Johns Hopkins University
Baltimore, Maryland

My dear Dr. Bennett:

The United Nations Relief and Rehabilitation Administration is considering the development of rehabilitation facilities for the crippled and disabled in certain war-torn countries. The plans call for the establishment of Rehabilitation Centers in which various special facilities will be furnished, including occupational and physical therapy, artificial appliances, vocational analysis and training. When it is found wise, physical therapy training schools will be established in connection with the medical schools. We are in communication with the American Physical Therapy Association and the American Occupational Therapy Association on this matter.

We need help in securing information regarding artificial appliance shops and brace shops which have a course of training and will accept students from other nations, particularly from China at this time. Is the brace shop at Johns Hopkins University available for such purposes? If it has not received outside trainees in the past, would it now consider accepting two Chinese for special training?

Any suggestions which you can offer in this matter will be gratefully received.

Sincerely yours,

Bell Greve

Relief and Rehabilitation Administration
1344 Connecticut Avenue
Washington 25, D. C.

Dear Miss Greve:

Apprentices in brace shops usually serve three years in order to become thoroughly well trained brace makers. Recently shorter periods of training have been given because of the pressure on men who can do this work. At the present time there is a Doctor from South America assisting in the brace shop at the University of Chicago for training. He will stay there about one year. At the end of that time it has been planned to have the Superintendent of the brace shop at the University of Chicago go back to South America to supervise the installation of a modern brace shop there and to stay until it is operating smoothly. I believe that this would be the best arrangement which could be made as far as Greece or China are concerned.

It is important that the Doctors be sympathetic toward the importance of good braces and know something about braces if the brace shop is to serve a really useful purpose. It is quite possible that either my own brace shop or that at the University of Chicago would be in a position to accept some one or two men at a time for a period of training. Anything less than a year, however, would be more or less wasted.

Assuring you that I will be glad to help out in any way possible, I am

Very truly yours,

My dear Dr. Campere:

At the present time I am helping in the UNRRA office in the development of plans for the rehabilitation of the crippled and disabled of Greece and China. Naturally, we are confronted at the onset with the need of braces and artificial appliances.

I understand that you use braces from the Pope Foundation. What is your opinion about the advisability of ordering such parts in mammoth wholesale lots for use in Greece? How long would it take to train someone either at the Foundation, or, it has been suggested, in your shop, so that they could go to Greece and help to train someone there? Does such an idea have any value? Would it be possible for any surgeon in Greece to make proper use of these braces, or would it be necessary for us to have someone from the States, yourself, for example, spend some time in Athens working with doctors there on their use?

We shall be most grateful to you for a frank opinion in this matter.

Sincerely yours,

Bell Greve

2 January 1945

Dr. O. L. Miller
173 Seventh Street
Charlotte, N.C.

My dear Dr. Miller:

You will be pleased to know that the United Nations Relief and Rehabilitation Administration is contemplating the development of a program for the rehabilitation of the crippled and disabled in certain nations as requested, and particularly in China and Greece at the present time.

We are collecting as much information as possible regarding training opportunities in the United States and in other nations, particularly Great Britain. We are in communication with the National Association for Occupational Therapists and the American Physical Therapy Assn. regarding training opportunities in both these fields.

It is not so easy to secure similar information regarding training for artificial limb makers and brace makers. We would be most grateful to you if you could help in this particular. We expect to establish brace and artificial limb shops as part of the rehabilitation centers which will be developed in other nations. While plans are being made, we should like to place qualified students in training here and locate qualified personnel to be sent to the new training shops as they are developed.

Any suggestions you may care to offer will be gratefully received.

Miss Greene

January 15, 1945

Miss Bell Breve
United Nations Relief and
Rehabilitation Administration
1344 Connecticut Avenue
Washington 25, D. C.

Dear Sir:

Your letter to Mr. Richter has been turned over to the writer
for proper handling.

We do not have any catalogs or publications which would give
you information regarding the work of the Pope Foundation, Inc.

The Foundation is not equipped to train brace makers. We do
not know of any particular training school or center in which
training could be had at the present time.

The Pope Foundation is set up to provide metal brace parts
which will facilitate the making of a better leg brace. By means
of mass production we are able to provide a standard metal joint
for the ankle and for the knee as well as the connecting uprights.

On account of the war the use of these parts is restricted
to two individual concerns; namely, The University of Chicago and
the Lakeview Brace Shop which is conducted by Dr. E. L. Compere.
Specifically, the metal parts which the Foundation furnishes are for
orthopaedic purposes only. We do not make any metal parts for
artificial limbs.

We would be more than glad to assist you, if a way could be
found to establish a training school in the proper use of these
parts.

Yours very truly,

THE POPE FOUNDATION, INC.

File

12

3 January 1945

Mr. Henry Richter
Pope Foundation
Kankakee, Illinois

My dear Mr. Richter:

The United Nations Relief and Rehabilitation Administration is interested in having catalogs and other publications which will give us information regarding the work of your Foundation.

Will you also inform us if you are equipped to train brace makers in the use of your appliances? How long does such training take? What is covered in the course?

We are contemplating the development of rehabilitation centers for the crippled and disabled in certain war-torn countries, particularly China and Greece at this time. Naturally, one of the most important needs is the furnishing of artificial braces and appliances. It will be some time before shops are organized for their production, so that in order to meet immediate needs, purchases will have to be made in this Country or other countries now equipped to supply such articles. Is the Foundation prepared to accept orders for overseas needs? If so, in what quantity? May we have a list of some of the institutions, agencies and doctors who are now using your braces?

We shall be pleased to have any discussion of this subject from you.

Sincerely yours,

Bell Greve
Consultant on Rehabilitation
Welfare Division

Dr. A. C. Bachmeyer, Director
Division of the Biological Sciences
The University of Chicago
Chicago 37, Illinois

Dear Dr. Bachmeyer:

Thank you for your informative letter of
10 January, replying to Miss Bell Greve's
request for information regarding the train-
ing of brace makers in your brace shop.

Miss Greve is not in Washington at this time,
but is expected to return the latter part of
this month. Your letter will be brought to
her attention upon her return.

Very truly yours,

Frieda C. Miller
Secretary to Bell Greve

Washington 25, D.C.

Dear Miss Greve:

Receipt is acknowledged of your letter of January
first.

I regret to have to inform you that we do not
conduct an organized course of training for brace and appliance
makers.

We do operate a brace shop. It is in charge of a
very capable brace maker, who has had years of experience. At
the present time there is a young man from South America
working with him. This young man was sent to us by the
National Foundation for Infantile Paralysis and will remain
for six or more months before returning to his home and opening
a brace shop there.

We could, under similar circumstances, afford
training and experience to occasional, well qualified students,
not more than one or at most two at a time. The University,
however, does not look with favor upon the establishment of
vocational courses.

If we can be of assistance in the manner suggested
we shall be pleased to offer our cooperation.

Sincerely yours,

A. C. Bachmeyer

Dr. A. G. Bachmeier
University of Chicago
Chicago 37, Illinois

My dear Dr. Bachmeier:

The United Nations Relief and Rehabilitation Administration is helping in the development of rehabilitation service for the crippled and disabled in certain nations as requested, and an immediate concern is that of training brace and artificial appliance makers from these nations so that they may conduct and develop the work in their particular nation.

We are interested in knowing if the University of Chicago has a training program for such technicians, and whether properly qualified students from other nations would be accepted and under what conditions.

I am very sorry that when I was in Chicago a couple of weeks ago there was no opportunity of discussing this matter with you personally. I appreciate how busy you are, but we will be most grateful to you for your consideration of this subject.

Sincerely yours,

Bell Greve
Consultant on Rehabilitation
Welfare Division

Dear Mr. Greve:

In reply to your letter of January 1 I regret to advise you that the University of Illinois does not offer courses of training for brace and appliance makers. Consideration is being given to the possibility of organizing such instruction, but I can report no progress at the present time. In the event that we do organize such a course, foreign students would be acceptable under whatever admission requirements were set up. These would probably be as a minimum, graduation from high school or its foreign equivalent.

Sincerely yours,

R.B. Allen

Dr. Raymond B. Allen
Executive Director
University of Illinois
853 West Polk Street
Chicago 12, Illinois

My dear Dr. Allen:

The United Nations Relief and Rehabilitation Administration is deeply concerned about the development of rehabilitation facilities for the crippled and disabled in certain nations, particularly China and Greece at this time.

One of the outstanding needs is the securing of adequate braces and artificial appliances. These cannot be furnished unless there are qualified brace and appliance makers.

We are attempting to locate places in the United States and other nations where brace and artificial appliance makers may be trained. We should be pleased to know if your University offers such a course of training, and whether Chinese or Greek students would be accepted and under what conditions.

Sincerely yours,

Bell Greve

22 March 1945

Mrs. Margaret Pope Hovey
399 Fullerton Parkway
Chicago 14, Illinois

My dear Margaret:

I am forever grateful to you for keeping us informed of the various conferences which are being held regarding braces and artificial appliances. Certainly something definite will have to be done. I am delighted that one of the results of the Chicago meeting is the decision that the National Research Council will have a definite program of research in artificial legs.

Thanks for letting me know that the University of Chicago shop will take trainees. Unfortunately, we have no one ready at the present time. Transportation from other nations is difficult, and I am not sure how soon we can get anyone over, so I feel that the vacancies should not be held for us. It breaks my heart to say this, but I must be honest. We simply do not know when or how many students can come over, and we feel the training should be given to natives so that they will continue the work in their own countries.

You, of course, must be delighted with the progress being made in the establishment of the Chicago Rehabilitation Center. I do hope it goes through soon, and as I said previously, it should be one of the best in the United States because there has been so much thought put into its development.

You are to be congratulated over and over for finally breaking into the architect's group, so that future building will consider persons with disabilities. I hope that UNRRA can be effective in a like manner in war-torn countries.

I shall be leaving any day, and hope to be back by Thanksgiving. My address overseas will be: UNRRA Greece Mission, A.P.O. #512, c/o Postmaster, New York, N.Y. Naturally, I shall be delighted to hear from you.

Sincerely yours,

Bell Greve
Consultant on Rehabilitation
Welfare Division

Mrs. Margaret Pope Hovey

399 FULLERTON PARKWAY
CHICAGO 14, ILLINOIS

Dear Bell,

It was so good to have
your letter of March 14, and
to catch up with you again. I
tried to reach you in Washington
by phone when I was in N. Y.
Two weeks ago seeing Dr. Juden-
kunot & Dr. Philip D. Wilson on
this brace technicians' training
course & the future goal of
licensing & professionalizing
this work. I had had hoped to
discuss the program via telephone
with you, and to offer any
help as well as ask for advice.

Dr. Chou was at the Univ. of
Chicago Clinics where the Pope
brace is used — also a pur-
chasing agent for the Russian
Government. They seemed much

interested. Within two weeks
both Dr. Bachmeyer of the
Univ. of Chicago and Dr. ~~Compton~~^{Compton}
of Chicago have said that
they could take 2 appren-
tices each in their shops,
the University immediately
and Mr. Compton in the near
future. I would be happy
to have you pass this word
along to Dr. Chang or ^{any one}
else in your organization. ^{Chang, Russia or}
I am sure that the Pope Founda-
tion would supply parts to
any group who would send
a technician to be trained
in their use. When you spoke
of Mr. Shands & the army (knowing
that many of their braces are
sturdy but heavy & obsolete, and
difficult of procurement in
large quantities) I thought
I would pass this word along
to you before anyone else. May
I hear from you (if this letter
reaches you before you depart) or

Frederick

there are many groups interested in these openings. I believe it could be a wonderful help in your program. One well trained man could teach others in Greece - and if necessary go on to China, although there would be better.

Mr. Gudakunst practically asked for the brace program. I was to hear after the Foundation's board meeting held on the 15th. Our idea was to start two centers, one in N. Y. and one in Chicago, to get the thing going, the Nat'l. Found. to finance same.

Dr. Wilson is interested in the same program for artificial limb technicians for the Nat'l. Research Council's Committee on this, which he heads. I think the ball is moving now. The All. Commission sent on a questionnaire to 20 orthopedists asking if they favored same & 19 answered affirmatively.

It is most encouraging -

The Chicago Rehab. Center
is being pushed - by the Fed.
Rehab. people, a meeting
having recently been held here
in Chicago on it. I'm deep
in trying to clear up the
state Rehab. situation here
and have been working with
experts on reports, regarding a final
changes, talking to politicians etc.
I hope something ^{new} ~~of some~~ ^{will be} ~~done~~
We are ^{now} going on the ^{architectural} committee
to "Minimize Physical Blockings
for the Handicapped". Ill. is
going strong and the Nat'l. Soc.
is sponsoring a Nat'l. Campaign
& financing & lending staff to
same. You know how we pushed
on that in Wilmington. & Then
at the Edgewater Beach. I couldn't
get any response from the Nat'l.
until after the Ill. Commission,
Col. Holabird & Mr. Hammond,
(nationally famous architects) went
to town with me on it.
Your Cuba experience was

grand. You are doing a real "Good
Neighbor" as well as medical
job. Good fortune, and God
bless & watch over you on
this trip. Do let me have
your address, and do let
me know if I can help at
any time. As you know
I'll with you in spirit, affection
and interest wherever you
may be.

May we meet soon again.

Love -
Margaret.

Places Available for Foreign Students	Remarks
1945 1 or 2	1946 Does not conduct an organized course of training for brace and appliance makers, but does operate a brace shop, in charge of a capable and experienced brace maker. Could afford training and experience to occasional, well-qualified students, but not more than 1 or 2 at a time.
	Consideration is being given to the possibility of organizing a course of instruction for brace and artificial appliance makers. If it is organized, foreign students would be acceptable under whatever admission requirements were set up. These would probably be as a minimum, graduation from high school or its foreign equivalent.

No reply

Held for Miss Greve.

Dear Bell:

Enclosed is a copy of Mr. Watson's qualifications and training.

If you will treat the following information as a confidence and not let my name come into it, I will appreciate it:

Mr. Watson states that the Venezuelan trainee is so good that he would be happy to have one or two more trainees with equal qualifications. I immediately thought of your Greek and China program and feel that you might have a good chance of getting one or two key men trained at Billings under Watson whom, in turn, could train others. At least it's worth writing Dr. Bachmeyer about, again. I know that Mr. Watson would accept this responsibility if you could clear through Dr. Bachmeyer. I also feel that you have a good chance of getting at least partial delivery on The Pope Foundation brace providing you have the personnel to set the brace up.

Sincere best wishes and hoping to see you in Chicago at the end of January.

Devotedly,

Peggie

Gentlemen:

If rehabilitation centers are developed for the crippled and disabled of certain war-torn countries in Europe, we shall immediately be faced with the urgent need for trained manufacturers of braces and artificial appliances. Therefore, carefully selected native students from these countries will be sent to the United States, Great Britain and other countries where training facilities are available for this profession.

We understand that your hospital has an outstanding Brace Department. Do you also manufacture artificial appliances? Would you consider accepting a small number of students from other nations for training in this work? If so, what should their qualifications be? How long would the training course be, and what would be the cost for such training?

Would you find it possible to release one of your skilled instructors to help in the development of a training and production shop for braces and appliances either in Greece or China?

We should like very much to have a frank discussion of these problems with you.

Sincerely yours,

Bell Greve
Consultant on Rehabilitation
Welfare Division

3 January 1945

Association of Limb Manufacturers of America
Research Institute Foundation
1376 National Press Building
Washington 4, D.C.

Gentlemen:

The United Nations Relief and Rehabilitation Administration is contemplating the development of rehabilitation centers for the crippled and disabled in certain war-torn countries. One of the most important needs is that of artificial appliances. It is expected that shops will be established in the rehabilitation centers for production of these appliances, but until they are staffed by qualified personnel there will be the need of purchase.

We have written Mr. Korrady for a list of the limb manufacturers of America, and are securing similar information from Great Britain and other nations. We shall appreciate it if you will let us know where the best places are in the United States for the training of artificial leg makers. We shall communicate with such schools to ascertain whether proper candidates can be accepted from other nations for such training.

Any suggestions which you have to offer in this matter will be appreciated.

Very sincerely yours,

Bell Greve
Consultant on Rehabilitation
Welfare Division

Appliance Makers

Dr. Philip Duncan Wilson
Hospital for Special Surgery
New York City, New York

My dear Dr. Wilson:

The United Nations Relief and Rehabilitation Administration is considering the development of rehabilitation centers for the crippled and disabled in Greece and China. At the present time, I am assisting in some special work in this general field.

Naturally, there is great need of trained staff in all the special services of rehabilitation. The tentative plans call for the sending of various types of professional staff abroad, recruiting and training of native staff in training schools here and in other nations in a position to train students, and the developing of training schools for certain professions in other nations.

One of the greatest needs is for skilled brace and artificial appliance makers. We are endeavoring to secure a list of the best training schools in the United States for such workers, and shall communicate with the London Council for Cripples regarding training centers in London.

Knowing of your wide experience here and abroad, we shall be most grateful to you for any suggestions or recommendations you may care to make in this particular matter, or on the entire subject.

Sincerely yours,

Bell Greve
Consultant on Rehabilitation
Welfare Division

REPORTS OF ETHEL BRIESEMEISTER ON VISITS
TO BRACE AND LEG SHOPS AND THE AMPUTATION
CENTER AT WALTER REED

1 June 1945

Dennison Brace Shop, 8 West 20th Street, Baltimore, Maryland. Tel. Belmont 9645

This shop is moving to a larger building in August or September, 1945. The new address will be 250 8th Street, Baltimore.

It is not necessary to write or call ahead of time when planning a visit. The shop closes at 5 o'clock.

I explained that the next visitors would probably spend the day at the Children's Rehabilitation Institute and wouldn't get back until 4:30 or a little later. He said to call if they wanted to visit his shop after 5 p.m.

The Dennison Shop makes peg legs at a cost of \$35. Would suggest someone try to get some pictures of children wearing them. As soon as the work is completed the brace leaves the shop so it would be more satisfactory to try to see his appliances at a clinic. He does a lot of work for Dr. Phelps, at the Children's Rehabilitation Institute.

Children's Rehabilitation Institute, 3038 St. Paul, Baltimore, Md. University 4250

The telephone is Dr. Phelps's office number. The school is 18 miles out of the city. A bus leaves at 8:30 from Falls Road and Kelly Road. It takes the teachers out and brings them back at 4:30. Take a No. 25 car from the city and get off at Kelly Road. The bus is a school bus. Taxi fare each way is \$5. Dr. Phelps's office girl wants to know in advance when people are coming, so she can make arrangements at the school and with the bus driver. Visitors are very welcome.

Hanger Brace Shop, 221 G Street, N.W., Washington, D.C. Tel. National 1037
The J. E. Hanger Co., Inc.

This is one of the largest artificial leg and arm manufacturers in the country, with offices in France, England and Canada. It is very worth while visiting, but their appliances are expensive. Ask to see Mr. Griffith, and make an appointment in advance. Lt. Hanger, of the Hanger Company's family is the orthopedic officer in the amputee center at Walter Reed Hospital.

Walter Reed Hospital.

Ask what time they teach gait training to the patients with artificial limbs. They have a class, usually in the afternoon. Ask for Col. Hudnell, Executive Officer, Physical Therapy Dept. First floor of the Medical Building. He will call the Physical Therapy Department and make the arrangements for a visit. (The technicians are very busy but are most helpful in showing their work and answering questions.

The trip to Forest Glen was very helpful but I believe the same thing can be seen at Walter Reed.

Summary of Conference on
Crutch Project of C.O.'s

Physical Rehabilitation
General Reports + Summaries

TO: Dr. Norman L. Gold, Requirements and Allocations
Coordination Branch
Dr. William A. Reggio, Health Division
Mr. Hall Stenz, Camps Division, Bureau of Areas
Miss Jeanne Simmons, Bureau of Supply
Miss Eugenia Keller, Medical and Sanitation Supplies Division
Miss Maude Barrett, Welfare Division
Mr. Schotts, National Service Board
Mr. Hume, National Service Board

FROM: Frieda C. Miller, Welfare Division

SUBJECT: Report of conference held 11 January 1945 in the office of Dr. Gold, relative to the possibility of manufacture of braces and artificial appliances by certain conscientious objector groups.

Mr. Schotts, of the National Service Board, spoke of the interest of the "Peace Churches" (Quakers, Mennonites and Friends) in the shortage of braces and artificial appliances, and the possibility of using conscientious objector groups for the manufacture of canes, crutches, braces and artificial appliances. He stated that about 4,000 of these men are now living in abandoned Civilian Conservation Corps camps throughout the country, that a great deal of idle shop equipment is available in these camps, and that the men would welcome an opportunity of being useful in this way. He further stated that the Selective Service Board is willing to consider such work a matter of National importance, and to assign some of these men to locations where material and equipment is available, and that qualified men from these camps would be permitted to take specialized training in the manufacture of such equipment. He summed up his proposal as follows: "If UNRRA will furnish some specialized equipment and the necessary expenses for raw material, we will furnish the manpower and shop equipment to manufacture rehabilitation appliances, with the understanding that whatever is manufactured will be turned over to UNRRA for disposition."

Dr. Gold and Miss Simmons thought that funds would be available from certain contributions to provide raw materials required for such an enterprise, but Miss Simmons added that expenses of the project would have to be cleared through the War Relief Control Board. Mr. Stenz suggested that recreational equipment might also be produced. Mr. Schotts said that raw material such as lumber will be available through the National Forestry Service. He added that, while labor would be free, there are usually maintenance features in these special projects; that the churches are sponsoring the camps and financing these programs for the men, as the government is not providing help of any kind for the welfare of conscientious objectors.

After further discussion, it was decided that Dr. Reggio should work out a rough estimate of the civilian needs for Europe and the Far East; an estimate would be made of what can be provided to meet these needs; Mr. Schotts will present these estimates to the Selective Service Board. Dr. Gold promised to have a reply ready for Mr. Schotts within the next two weeks. Mr. Schotts will be available for further discussion.
