EVNCO 309

25 July 1961

Dear Sir Alexander,

You will recall that in February 1961 the Refugee Relief Coordinator appealed for tents to relieve the terrible overcrowding in the hospitals in South Kasai, and that the British Government promptly made a loan of 150 tents, capable of sheltering 1800 patients, from Nairobi. The tents were drawn on loan, and were checked and signed for by the Chief Ordinance Officer, ONUC, who flew to Nairobi for the purpose.

We have now heard from the British Embassy, by the letter of which a copy is attached, that the British Government will not require the return of these tents, but that their cost, amounting to £42,334 (\$118,535) will be deducted from the further contribution of two million dollars to the Special Fund, promised by the United Kingdom in November 1960.

This is not likely to be welcome news in New York and before we give effect to the decision in ONUC accounts, I wonder whether you might wish to suggest to the British Government that we be given the opportunity to pay for the tents

Sir Alexander MacFarquhar
Special Adviser for Civilian
Affairs in the Congo
United Nations
New York 17, New York
U.S.A.

instead. As you know, the Red Cross and other Societies in the United Kingdom received substantial sums from the public as a result of the great publicity given to the South Kasai tragedy, but have had difficulty in spending the funds, mainly because we received ample relief supplies in kind. If the question of these tents were put to the U.N. Association in the United Kingdom it may be that they could persuade the collecting societies to underwrite part or even the whole of the cost, and thus relieve the Special Fund of a heavy charge.

May I know your views on this suggestion, please?

Yours sincerely,

R.J.B. Rossborough
Officer in Charge
Civilian Operations
ONUC

RR-257

20 June

1

Mr. J.M. Capestrani, Acting Refugee Relief Coordinator, Luluabourg
P.W. Tooby, Economic Relief Coordinator

1. I refer to your RR-1030 of 16 June.

....

2. By my signal RR-860 of 18 May (copy herewith) I requested to be informed urgently of the TYPES and QUANTITIES of tents at that time available at Lac Mukanba, evacuated from Bakwanga.

....

3. Mr. Kaufman replied (166/C copy herewith):

"No further tentage required at Lac Mukanba as site chosen for depot and installations adequate stop Present tentage left by Austrian Medical Team all in use stop"

4. From the foregoing you will see that I failed to obtain the information required and, in consequence, by my RR-253 of 14 June, I asked, once again, for details of TYPES and QUANTITIES of all tents belonging to Refugee Relief, including those used by the Austrian Medical Team, Pakistani Unit etc., and brought out from Bakwanga.

5. Furthermore, I instructed that you were to assure that all tents were to be recovered from Lac Mukanba and properly stored in Luluabourg.

6. Your reply, ref. RR-1030 of 16 inst. is still inadequate so please therefore give this matter your urgent attention, carrying out my instructions, and supply me with the detailed information required.

Mr. X. Caballero Refugee Relief Coordinator - Bakwanga
~~ONUG-Bakwanga~~
John Grün Chief Refugee Relief Coordinator
Beds and blankets for Disele Hospital

We are in the process of purchasing 1,000 blankets and five hundred beds for the Disele Hospital. We shall be airlifting at least part of these supplies soon and I will give your further details as soon as I am in a position to do so.

The purpose of this memorandum is to inform you that Caritas-Congo have agreed to reimburse the UN Congo Famine Relief Fund for these supplies on condition that the beds will be put at the disposal of Bishop Nkengolo once they are no longer needed at the tented hospital. (The beds will be of the "permanent" folding type and not "camp cots") The blankets will be "written off" more or less on the assumption that the patient will take the blanket with him upon being discharged.

I have agreed to these conditions and ask you to bear this in mind when the time of "liquidation" comes./.

Léopoldville, le 24 Janvier 1961.-

A Messieurs les Dirigeants de l'O.N.C. Congo
Building Royal
Léopoldville/Kalina.
=====

Messieurs,

Concerne : V^Ente d'une parcelle, sise Boulevard M'Benga n° 8 Kinkole
=====

Par des renseignements reçu des mes amis lors de la réunion des Entrepreneurs, que si peut de temps l'O.N.U.Congo va recevoir des réfugiés de Bakwanga ici à Léopoldville pour une durée indéterminée. Ceux réfugiés ~~vont~~ seront resté à Kinkole pendant toute la durée qui vont faire ici à Léopoldville.

Par cette raison, je sollicite auprès de Dirigeants de l'O.N.U.Congo d'acheter ma parcelle sise Boulevard Mbenga n° 8 à Kinkole pour permettre de faire loger les réfugiés qui sont à votre charge de louer toute ma parcelle.

Dans l'attente d'une suite favorable de votre part, je vous prie d'agréer, Messieurs les Dirigeants, l'assurance de ma considération très distinguée.

Pedro Raoul

Chief, Military Personnel

S. Linner, Chief, Civilian Operations

To meet the medical emergency existing among the Bakwanga refugees, an appeal was launched for tents to bring under shelter an estimated 1,500 refugees who are extremely ill and in immediate need of medical care, but for whom there is no hospital accommodation.

The Government of the United Kingdom has responded to this appeal with an offer to lend 150 tents for the purpose, which are now located in Kenya.

I am arranging for immediate airlift of the tents to Bakwanga. It is essential that the proper accounting should be made for these tents on loan. For this purpose I have asked the Chief of Logistics Branch to supply a detachment, under the command of an officer, who could proceed immediately to Nairobi via Uganda to take delivery of the tents.

Would you please therefore authorize the journey of Lt. Col. M. Shaukat Ali, one warrant officer and two other ranks, to travel to Nairobi via Kampala and return by UN aircraft from Leopoldville to Entebbe, Uganda, commercial aircraft Entebbe to Nairobi and the aircraft carrying the tents from Nairobi to Bakwanga.

No. 146

January 22, 1961.

PRIORITY

Addressed to Foreign Office telegram No. 146 of January 22 repeated for information to Governors of KENYA - 5, UGANDA - 5, TANGANYIKA - 3 and UKHC SALISBURY - 4.

Your telegram No. 249: tentage U.N. gladly accept your offer.

2. U.N. are reluctant to divert aircraft from food delivery flights in order to collect tents from Kenya. Would it be possible to arrange a civil air charter to deliver tents to Bakwanga? Failing this I suggest they be delivered by R.A.F. to Usumbura, whence it would be a shorter haul for U.N. to collect and deliver to Bakwanga.

3. U.N. have requested an urgent reply on these alternatives. If neither is possible they will try to arrange an airlift by U.S. Air Force, through U.N. headquarters.

M. Guin

C/Soc 520/2/3

Embassy of the United States of America,
Leopoldville, Republic of the Congo,
January 17, 1961.

Mr. Sture Linner,
Chief, Civilian Operations,
United Nations Organization in
the Congo,
B.P. 7248,
Leopoldville.

Dear Mr. Linner:

I have just received your letter of January 16 appealing for a donation of tents to aid in the serious situation now existing in the Bakwanga area.

I can assure you that I share your deep concern for the plight of these refugees and have sent a priority telegram to my government strongly recommending that we assist in every way we can.

Needless to say, I will be in touch with your office as soon as we have a response.

With kindest regards,

Sincerely yours,

Clare H. Timberlake
Clare H. Timberlake

Legisby
c/soc 520/2/3

16 January 1961

Your Excellency,

You are aware of the acute emergency situation and famine in South Kasai. There is a heavy accumulation of cases of starvation and deficiency diseases in need of specialized medical care. Because of shocking insanitary conditions in the greatly overcrowded hospitals and dispensaries, particularly those in Bakwanga and Miabi, medical reports stress the immediate danger of an epidemic of gastro-enteritis among the refugees. In that event, even more refugees would die from that cause than are now being lost from starvation and kwashiorkor. Immediate steps have been taken to send in a complete medical team of about fifty personnel to be deployed around the hospitals at Bakwanga and Miabi, so as to be able to use the general facilities of these two hospitals. Medical supplies have been provided for this team and they will move in two days to the area. There is at present no means at all of bringing under cover the cases of starvation and deficiency diseases in immediate need of specialized medical care, estimated to number at least 1,500 today. In the circumstances now obtaining in the area, it is impossible to construct anything like adequate cover from local materials. Time does not permit the importation of building materials and solid construction. The only practical answer is tentage which we do not have.

.../...

His Excellency

The Ambassador of the United Kingdom
LEOPOLDVILLE

Will you please make immediate and most urgent enquiries of your Government to establish the availability of large tents of the marquee type, in a sufficient number to house 1,500 patients, which could be delivered immediately to the Congo. We will take almost any tent that will keep out tropical rainstorms. They should be complete with poles, lines and pegs, but flooring is not important.

Tentage available in Africa is required immediately by airlift to Bakwanga. ONUC will provide the airlift if your Government cannot do so. Tentage available in Europe should be delivered immediately by air to Pisa for onforwarding by the established ONUC airlift.

I must stress again the uncompromising threat of disastrous loss of life among the refugees unless we put these hospitals and medical services into immediate operation, which cannot be done without the tentage I have requested here.

I have today addressed the same urgent appeal to the Ambassadors of the United States and of France in Leopoldville.

Please accept, Your Excellency, the assurance of my highest consideration.

Sture Linner
Chief, Civilian Operations

Le 16 janvier 1961

A : Son Excellence l'Ambassadeur de France

Du : Dr. S. Linner, Chef des Opérations Civiles

Monsieur l'Ambassadeur,

Vous n'ignorez pas la situation alarmante qui règne dans le Kasai méridional où sévit la famine. Nombreux sont les cas de famine et les maladies qui résultent de la sous-alimentation rendent nécessaires des soins médicaux spécialisés. Etant donné la situation sanitaire lamentable qui règne dans les hôpitaux et les dispensaires par trop surpeuplés, notamment à Bakwanga et Miabi, les rapports médicaux soulignent qu'il existe un danger imminent d'épidémie de gastro-entérite parmi les réfugiés. Si cette épidémie éclatait, elle entraînerait la mort d'un nombre de réfugiés encore plus grand que celui de ceux qui meurent chaque jour de faim ou des suites du kwashiorkor. Des mesures ont été prises immédiatement pour envoyer une équipe médicale complète comprenant environ 50 personnes, qui sera répartie dans les hôpitaux de Bakwanga et de Miabi où elle utilisera toutes les installations offertes par ces deux hôpitaux. Des fournitures médicales ont été remises à cette équipe qui doit partir dans deux jours à destination de cette région. Il est actuellement impossible de fournir un abri à toutes les personnes frappées de famine ou atteintes de maladies dues à la sous-alimentation, et qui doivent recevoir immédiatement des soins médicaux spécialisés (1.500 personnes environ estime-t-on actuellement). Etant donné les conditions actuelles dans cette région, il est impossible de construire des abris suffisants à l'aide de matériaux d'origine locale. On ne dispose pas non plus du temps nécessaire pour importer des matériaux de construction ou des éléments d'habitations, et la seule solution consiste actuellement à loger les gens dans des tentes dont nous ne disposons malheureusement pas.

Voudriez-vous avoir l'obligeance de demander de toute urgence à votre Gouvernement s'il disposerait de grandes tentes de type "pavillon" qui puissent être expédiées immédiatement au Congo en nombre suffisant pour loger 1.500 malades. Nous sommes prêts à accepter toute tente qui puisse résister aux orages tropicaux. Ces tentes devraient comprendre les mâts, les cordes d'attaches et les piquets, le plancher ou tapis de sol étant de moindre importance.

Les tentes disponibles en Afrique devraient être transportées immédiatement par avion à Bakwanga. L'ONUC fournira les appareils nécessaires à cet effet au cas où votre Gouvernement serait dans l'impossibilité de le faire. Les tentes disponibles en Europe devraient être expédiées immédiatement par la voie aérienne à Pine d'où elles seront réexpédiées par les services réguliers de l'ONUC.

Je me permets d'insister à nouveau sur le grave danger de pertes en vies humaines qui menace les réfugiés si l'on ne peut organiser immédiatement ces hôpitaux et assurer les services médicaux nécessaires, et les tentes que nous avons l'honneur de solliciter nous sont indispensables à cet effet.

J'adresse ce jour, le même appel urgent à Messieurs les Ambassadeurs de Grande-Bretagne et des Etats-Unis.

Veillez agréer, Monsieur l'Ambassadeur, les assurances de ma très haute considération.

S. Linner
Chef des Opérations civiles

In that event, even more refugees would die from that cause than are now being lost from starvation and kwashiorkor. Immediate steps have been taken to send in a complete medical team of about fifty personnel to be deployed around the hospitals at Bakwanga and Miabi, so as to be able to use the general facilities of these two hospitals. Medical supplies have been provided for this team and they will move in two days to the area. There is at present no means at all of bringing under cover the cases of starvation and deficiency diseases in immediate need of specialized medical care, estimated to number at least 1,500 today. In the circumstances now obtaining in the area, it is impossible to construct anything like adequate cover from local materials. Time does not permit the importation of building materials and solid construction. The only practical answer is tentage which we do not have.

.../...

His Excellency
The Ambassador of the United States
LEOPOLVILLE

Will you please make immediate and most urgent enquiries of your Government to establish the availability of large tents of the marquee type, in a sufficient number to house 1,500 patients, which could be delivered immediately to the Congo. We will take almost any tent that will keep out tropical rainstorms. They should be complete with poles, lines and pegs, but flooring is not important.

Tentage available in Africa is required immediately by airlift to Bakwanga. ONUC will provide the airlift if your Government cannot do so. Tentage available in Europe should be delivered immediately by air to Pisa for on-forwarding by the established ONUC airlift.

I must stress again the uncompromising threat of disastrous loss of life among the refugees unless we put these hospitals and medical services into immediate operation, which cannot be done without the tentage I have requested here.

I have today addressed this same urgent appeal to the Ambassador of the United Kingdom and to the Ambassador of France in Leopoldville.

Please accept, Your Excellency, the assurance of my highest consideration.

Sture Linner
Chief, Civilian Operations

16 January 1961

Your Excellency,

You are aware of the acute emergency situation and famine in South Kasai. There is a heavy accumulation of cases of starvation and deficiency diseases in need of specialized medical care. Because of shocking insanitary conditions in the greatly overcrowded hospitals and dispensaries, particularly those in Bakwanga and Miabi, medical reports stress the immediate danger of an epidemic of gastro-enteritis among the refugees. In that event, even more refugees would die from that cause than are now being lost from starvation and kwashiorkor. Immediate steps have been taken to send in a complete medical team of about fifty personnel to be deployed around the hospitals at Bakwanga and Miabi, so as to be able to use the general facilities of these two hospitals. Medical supplies have been provided for this team and they will move in two days to the area. There is at present no means at all of bringing under cover the cases of starvation and deficiency diseases in immediate need of specialized medical care, estimated to number at least 1,500 today. In the circumstances now obtaining in the area, it is impossible to construct anything like adequate cover from local materials. Time does not permit the importation of building materials and solid construction. The only practical answer is tentage which we do not have.

Le 16 janvier 1961

A : Son Excellence l'Ambassadeur de France

Du : Dr. S. Linner, Chef des Opérations Civiles

Monsieur l'Ambassadeur,

Vous n'ignorez pas la situation alarmante qui règne dans le Kasai méridional où sévit la famine. Nombreux sont les cas de famine et les maladies qui résultent de la sous-alimentation rendent nécessaires des soins médicaux spécialisés. Etant donné la situation sanitaire lamentable qui règne dans les hôpitaux et les dispensaires par trop surpeuplés, notamment à Bakwanga et Miabi, les rapports médicaux soulignent qu'il existe un danger imminent d'épidémie de gastro-entérite parmi les réfugiés. Si cette épidémie éclatait, elle entraînerait la mort d'un nombre de réfugiés encore plus grand que celui de ceux qui meurent chaque jour de faim ou des suites du kwashiorkor. Des mesures ont été prises immédiatement pour envoyer une équipe médicale complète comprenant environ 50 personnes, qui sera répartie dans les hôpitaux de Bakwanga et de Miabi où elle utilisera toutes les installations offertes par ces deux hôpitaux. Des fournitures médicales ont été remises à cette équipe qui doit partir dans deux jours à destination de cette région. Il est actuellement impossible de fournir un abri à toutes les personnes frappées de famine ou atteintes de maladies dues à la sous-alimentation, et qui doivent recevoir immédiatement des soins médicaux spécialisés (1.500 personnes environ estime-t-on actuellement). Etant donné les conditions actuelles dans cette région, il est impossible de construire des abris suffisants à l'aide de matériaux d'origine locale. On ne dispose pas non plus du temps nécessaire pour importer des matériaux de construction ou des éléments d'habitations, et la seule solution consiste actuellement à loger les gens dans des tentes dont nous ne disposons malheureusement pas.

.../...

Voudriez-vous avoir l'obligeance de demander de toute urgence à votre Gouvernement s'il disposerait de grandes tentes de type "pavillon" qui puissent être expédiées immédiatement au Congo en nombre suffisant pour loger 1.500 malades. Nous sommes prêts à accepter toute tente qui puisse résister aux orages tropicaux. Ces tentes devraient comprendre les mâts, les cordes d'attaches et les piquets, le plancher ou tapis de sol étant de moindre importance.

Les tentes disponibles en Afrique devraient être transportées immédiatement par avion à Bakwanga. L'ONUC fournira les appareils nécessaires à cet effet au cas où votre Gouvernement serait dans l'impossibilité de le faire. Les tentes disponibles en Europe devraient être expédiées immédiatement par la voie aérienne à Pise d'où elles seront réexpédiées par les services réguliers de l'ONUC.

Je me permets d'insister à nouveau sur le grave danger de pertes en vies humaines qui menace les réfugiés si l'on ne peut organiser immédiatement ces hôpitaux et assurer les services médicaux nécessaires, et les tentes que nous avons l'honneur de solliciter nous sont indispensables à cet effet.

J'adresse ce jour, le même appel urgent à Messieurs les Ambassadeurs de Grande-Bretagne et des Etats-Unis.

Veillez agréer, Monsieur l'Ambassadeur, les assurances de ma très haute considération.

BÂTIMENTS STANDARDS À OSSATURES MÉTALLIQUES

S'adaptant à n'importe quels types de constructions commerciales ou industrielles, toujours disponibles, de stock, en notre usine de Léopoldville

usines

dépôts

hangars agricoles

magasins

bâtiments publics

ateliers

Toutes nos ossatures métalliques de bâtiments sont usinées au Congo Belge et permettent la réalisation économique de constructions spécialement étudiées et adaptées aux exigences coloniales. Les fermes accordent toute une gamme de possibilités.

Nous disposons, en stock, des ossatures métalliques de tous nos types. Les parois sont normalement réalisées en tôles ondulées galvanisées, mais nos ossatures permettent d'exécuter des remplissages en maçonnerie ou mixtes.

Nous fournissons éventuellement:

- des chassis métalliques pour fenêtres, à ventilation réglable de 0 à 100%; des portes métalliques, à volet enroulable, parfaitement équilibrées et excessivement maniables; des dépassants de couverture périmétriques ou tronçonnés; les galvanisés comprenant les éléments ondulés de couverture, de remplissage, les cheneaux, les descentes, y compris les accessoires de fixation; les éléments métalliques permettant l'utilisation de palans monorails pour les manutentions intérieures; des ventilateurs statiques en faitière; des éléments d'adaptation à la réalisation des façades spéciales etc.

En raison de l'exécution série de nos éléments, à partir de machines et d'outillages à haut rendement, nous vous fournissons des constructions hautement économiques, de qualité imposée, rapidement livrables et érigibles. La rapidité de livraison est permise par la permanence et l'importance de nos stocks, tandis que la rapidité d'érection est accordée par notre système de repérage, en usine, de nos éléments d'ossature, étendu même à nos tôles ondulées de couverture ou de remplissage, ce qui permet d'atteindre une extrême simplification et compréhension des opérations de montage, au cours desquelles toutes opérations correctives de soudure, de coupe, d'alésage etc. sont rigoureusement exclues.

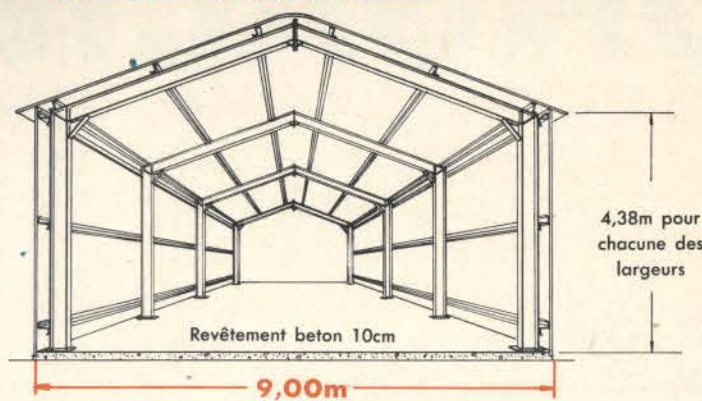

CONGACIER S.C.R.L.

B.P. 1689 Léopoldville, Congo Belge

Ces constructions sont disponibles aux dimensions suivantes:...

LARGEURS DE BASE:

LARGEURS COMBINÉES:

et offrent la gamme des possibilités ci-dessous:

PAROIS MAÇONNÉES DE HAUTEUR VARIABLE

Le remplissage des parois peut être réalisé sur une hauteur égale à $\frac{1}{4}$, $\frac{1}{2}$, $\frac{3}{4}$ ou $\frac{4}{4}$ de la hauteur libre. En pignon, le remplissage peut atteindre la ligne de pente des versants ou même se réaliser en attique; le fractionnement en hauteur permet de fermer les parois avec nos tôles ondulées, rigides, de format standard, pour obtenir des parois de bon aspect répondant économiquement aux problèmes de construction.

CHASSIS MÉTALLIQUES POUR FENÊTRES CAPACITÉ DE VENTILATION 100%

Ils comprennent un cadre rigide portant 5 volets à vitrage, pivotants, à commande simultanée de l'intérieur; ces ensembles peuvent être montés, soit individuellement, soit en groupes, soit en bandes localisées ou continues.

Les chassis peuvent se localiser soit dans la partie supérieure des parois, soit dans la partie centrale.

disposition haute
+ 2,32 m

disposition basse
+ 1,36 m

VOILETS MÉTALLIQUES

Les portes sont disponibles aux dimensions suivantes: 3,36 m de largeur x 3,90 m de hauteur; elles peuvent être placées, soit en pignons, soit en longs-pans, dans n'importe quelle travée de 6 mètres; elles présentent un volet métallique enroulable, équilibré, de conception simplifiée à l'extrême par l'élimination des organes mécaniques habituels; contre-pesage du volet permet une manœuvre rapide sous l'effet d'un très léger effort; ne nécessitent pratiquement pas d'entretien.

MONORAIL AXIAL

Un chemin de roulement monorail, permettant l'utilisation d'un palan de 1 tonne peut être livré également; le montage en est très aisé, pendant ou après le montage du bâtiment CONGACIER. Il suit l'axe longitudinal du bâtiment.

VENTILATEURS STATIQUES EN FAÎTIÈRE

Les ventilateurs statiques, qui se placent en faîtière, sont disponibles à la longueur 4,80m, peuvent se localiser dans n'importe quelle travée de 6 mètres, se monter individuellement, ou s'accoupler de façon à former des blocs continus ou tronçonnés de ventilation; les ouvertures sont condamnées par des panneaux en métal déployé; la ventilation peut être renforcée, éventuellement, par des bandes en métal déployé intercalées dans les parois de remplissage.

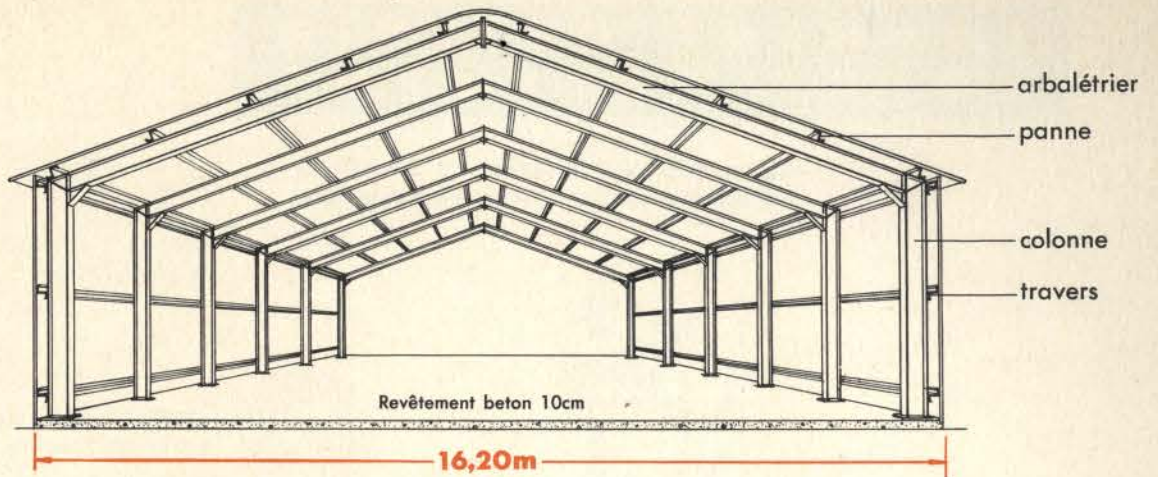

metal déployé

PLAFOND SUSPENDU

Nous présentons également un plafond suspendu, à montage métallique, pouvant supporter des panneaux isolants livrés directement aux dimensions; les tiges de suspension du plafond se boîtonnent directement aux pannes prévues à cet effet.

ns suivantes:...

LONGUEURS: 4 x 6m

sis peuvent se localiser soit *
partie supérieure des parois,
la partie centrale.

VOLETS MÉTALLIQUES

Les portes sont disponibles aux dimensions suivantes: 3,36 m de largeur x 3,90 m de hauteur; elles peuvent se placer, soit en pignons, soit en longs-pans, dans n'importe laquelle des travées de 6 mètres; elles présentent un volet métallique enroulable, équilibré, de conception simplifiée à l'extrême, par l'élimination des organes mécaniques habituels; le contrepesage du volet permet une manœuvre rapide sous l'effet d'un très léger effort; ne nécessitent pratiquement pas d'entretien.

DÉPASSANTS DE COUVERTURE

Les dépasses de couverture peuvent être utilisés individuellement, ou sur l'entièreté du périmètre de la construction; la portée du déissant est de 1 m 80 à partir du plan extérieur du remplissage, que ce soit en long-pan ou en pignon.

PLAFOND SUSPENDU

Nous présentons également un plafond suspendu, à gîtage métallique, pouvant supporter des panneaux isolants livrés directement aux dimensions; les tiges de suspension du plafond se boulonnent directement aux pannes prévues à cet effet.

ADAPTATION À FAÇADE SPÉCIALE

Dans le cas où la nature de l'entreprise exigerait une façade réunissant certaines conditions, les bâtiments Congaciel s'y adapteront facilement et seront livrés de façon à accorder toute liberté vis à vis de l'architecture souhaitée.

metal deployé

COMMENT OBTENIR VOTRE BÂTIMENT

1

Adressez-nous un croquis exposant vos besoins
ou téléphonez-nous pour demander notre visite.

2

Congacier vous enverra
immédiatement une offre
et un plan.

3

En cas de commande, Congacier vous fournira
un dossier, très imagé, reprenant les plans des
fondations, de repérage, de montage, ainsi que
les éléments particuliers à votre propre con-
struction (différentes phases silhouettées du mon-
tage, instructions à suivre etc.)

• le plan de fondation

• le plan de repérage

• la notice de montage

Tous les éléments de constructions métalliques
Congacier sont usinés en notre usine de Léopoldville

Nos services techniques sont à votre disposition.
