SUBJECT: WATER SHORTAGE IN NYAKARAMBI TRANSIT CAMP

Reference:

A. 5000.1(HAC)A/1 Dated 7 June 1995.

1. Reference "A" requested investigation into water shortage in NYAKARAMBI Transit Camp. The investigation was conducted this morning (1000 - 1145hrs) and the findings are as follows:-

(a) The camp was supplied with water on Monday 5th June by UNAMIR water tanker. The camp administration is rationing the water to the returnees and may run out this evening or tomorrow morning.

(b) There is water collecting point at RUSUMO Commune Bureau which is approx 300m from the camp. As at the time of the investigations the water tap was not running. The team was told that the water runs from 0600 - 0800hrs (2hrs) each day and that it is not purified from the water source into the reservoir before distribution at various collecting points.

(c) There were 642 returnees at the camp. Out of this number 107 will be transported this afternoon for settlement at RUKIRA, KIGARAMA and KAYONZA Communes all in KIBUNGO Prefecture. The team was told that some returnees will arrive at the camp this week from KIGALI and GISENYI.

2. It was observed that the water supplied through the pipe line is woefully inadequate and unsuitable for drinking.

3. It is therefore suggested that efforts be made for periodic supply of portable water for drinking while the local pipe borne water is used for washing and cooking.

FROM : DCHAC Date: 7 June 1995
SUBJECT : WATER SHORTAGE IN NYAKIRAMBI CAMP
Reference: Letter SOO dated 2 June 1995.
See Annex

1. In reference to Annex letter an update on the situation is urgently required.
2. So far UNHCR was not very cooperative and we have no confirmation whether this camp was supplied with water.
3. We have been informed by IOC that a water point in the vicinity of mentioned camp(approx 300m) can be used. Please confirm and give also information about quantity and quality of water.
4. Further, it is of interest how many people are stationed in the camp at the moment.
5. Please report back as soon as possible.
We are counting very much on your cooperation.

SUBJECT : ACUTE SHORTAGE OF WATER AT NYAKIRAMBI CAMP

1. The water piping system around the NYAKIRAMBI Transit camp is currently under repairs and it will take not less than two weeks to complete the repairs. The camp has been without water for the past 4 days thus making life very unbearable for the refugees.
2. Currently the transit camp has over 500 old case loads and additional 200 people are expected today. The water shortage is creating a lot of concern to UNHCR and the other NGOs working at the camp.
3. It is therefore requested that arrangements be made for a water tanker to be sent once every 3 days for two weeks to alleviate the acute water shortage in the camp. In view of the seriousness of the problem, it would be appreciated if the first water tanker is despatched today to the camp before the situation gets out of hand by the close of day.
4. Please treat urgent.

Spoke to Mr. Mohammed, water chief at UNHCR. He informed me that HCR, through BDA, is delivering water to the camp every 2 days. Next delivery tomorrow (8 June). The RPA also takes water from the camp — hence it runs out quickly. But there is no serious problem. Next week the main water system should be fully functional.

SUBJECT : WATER SITUATION IN NYAKARAMBI TRANSIT CAMP

Reference: Your letter dated 7 June 1995.

1. Many thanks and congratulations for your excellent report.
2. This office has been informed by IOC/UNHCR that every second day, mentioned camp will be supplied with 90,000 ltrs of water by UNHCR. It is understood that RPA uses some quantity of this water but in general the water situation is not bad at the moment. Further we have been informed that the repair work on the pipe system should be completed by next week.
3. You are requested to monitor the water situation in general and to give an update report to this Office.
4. We count very much on your cooperation.
