

SWISS TELECOM

WELCOM Supporting Statement

State-of-the-art technology and strategic alliances account for Swiss Telecom's key role in the international telecommunications marketplace

Swiss Telecom is excited and proud to participate in the promising WELCOM Project, a platform which will demonstrate its leadership to a distinguished world community.

Swiss Telecom's vision on WELCOM

As an early participant in the Project, Swiss Telecom promptly understood the implications of today's vision and challenge to connect the minds and entrepreneurial spirit of people around the world.

Swiss Telecom's contribution to the technology of WELCOM

Swiss Telecom has made a significant contribution to the technology underlying the creation of the visual communications network. Using the latest state-of-the-art technology available today, the WELCOM Project opens the door to new applications for the benefit of mankind. Swiss Telecom seized this unique opportunity to play an active role in this worldwide laboratory to test multimedia technology beyond its current capabilities.

Swiss Telecom meets the challenge of WELCOM

Switzerland, a small country and host of the World Economic Forum and the Annual Meeting of the WEF in Davos, provides the most sophisticated demonstration of its technological abilities. Swiss Telecom asserts itself as a global network provider. Swiss Telecom has installed all telecommunications infrastructures required in Davos to launch the project. Swiss Telecom's alliances and participation's concluded with national operators of quality infrastructures able to offer effective local support to WELCOM's foreign users make the project accessible to a large number of its members. This partner network and the extensive experience in the implementation of international projects enable Swiss Telecom to accelerate the link with foreign operators.
