PRESS RELEASE

Received No. 1257
By: AGATHA
Date: OCT. 5. 1995

UNAMIR NR 95-46

4 October 1995

OPENING OF THREE DETENTION CENTRES IN RWANDA

The President of Rwanda and the Special Representative of the United Nations Secretary-General are pleased to announce the opening of three detention sites built in response to the extreme overcrowding in Rwanda's prisons. The opening ceremony will be commemorated at the new expanded detention centre of Nsinda on Thursday 5th October 1995.

Rwanda's prison population currently stands at approximately 52,000 for an intended capacity of 12,500. Lack of space, food, adequate drainage and sanitary conditions have created high death rates resulting from dysentery, pneumonia and foot lesions due to swelling. The three completed sites, Nsinda, Nyanza and Onatracom will almost double Rwanda's existing capacity by together providing space for an additional 11,000 detainees, raising total capacity to 23,500. The opening of the centres will thus bring relief to the critical conditions for detainees who are all still waiting to be tried for crimes of genocide.

While the permanent extension to Nyanza is providing a capacity of 2,800 and the temporary site of Onatracom has a capacity of 5,000, Nsinda, with a capacity of 5,000 is the largest semi-permanent detention centre to be opened in Rwanda, requiring the greatest investment and coordinated work by the Government, United Nations and the International Committee for the Red Cross with the financial contribution of the International Community. Construction work at Nsinda has been a collaborative effort between United Nations Development Programme (UNDP) and the Ministry of Justice, responsible for constructing the perimeter wall, electrification and ensuring security measures are met, the International Committee for the Red Cross (ICRC) who installed living quarters, sanitary and kitchen facilities. The United Nations Assistance Mission to Rwanda (UNAMIR), the United Nations Department of Humanitarian Affairs (DHA) and the United Nations High Commissioner for Human Rights (UNHCHR) providing logistical support whenever necessary and power supplies. The overall coordination remained the responsibility of the Republic of Rwanda's Ministry of Justice. All work undertaken on the site was carried out by Rwandan contractors using local civil engineers and drawing on construction materials available within Rwanda.

The first detainees to be transferred will be from the existing site, currently holding 800 detainees for an intended capacity of 100. Detainees will then be transferred progressively from other congested centres. The opening of other sites will follow that of Nsinda, Nyanza and Onatracom within the following weeks.

- 2) Avoid recycling reports of incidents and information and
- 3) Coordinate analysis at the sector HQs and above.

① Copy handed
over to CIVPOL
officer
Ley

Activities

Ciripol and Milop officers visited on patrol the Nyamabye catchot.

Therein is kept a 14 years old boy who is accused by another boy to have stolen his bicycle. Because this boy had been, at that time, with an Russian officer on the market, he couldn't have done this. The prefect promised to find a solution up to 14.00 k. It couldn't be checked today.

The prefect was also asked for places of installation of 10 waterpoints the UN will arrange in his sector.

He will tell the distribution plan on Wednesday, Sept. 27th.

SUBJECT: Information Collection and Reporting

I refer to the above subject matter and comment as follows :

The FC having observed the mode and variance in information gathering and reporting particularly at the morning prayers and those utilized for SITREPS, decided to ensure that information pertinent to certain components like CIVPOL or MILOBS in accordance with their tasks are restricted to such component for reporting, so as to :

- 1) Prevent duplication of collecting and reporting efforts,
- 2) Avoid recycling reports of incidents and information and
- 3) Coordinate analysis at the sector HQs and above.

The FC further emphasised that information which comes to the attention of any component outside their tasks, should not be reported, rather, such information should be taken quickly and channelled to the component having the task for proper and efficient reporting of the incident.

AREAS TO REPORT ON :

Area : A. Security Information

- 1) Critical incidents such as deaths, injury or threat to UN or International Personnel;
- 2) Weapon discharge by a UN member;
- 3) Demonstrations or rallies against UNAMIR;
- 4) Military Operations by the RPA or FRGF

Area : B. Reconciliation / Rehabilitation

- 1) Requests by local civil authorities or urgent needs for relief and assistance are to be reported in the situation report;
- 2) Summaries of reconciliation and rehabilitation efforts are to be reported in the appropriate weekly or monthly report.

inlbs to see file. Briles

CIVPOL MAJOR TARGETS

Apart from those enumerated above, CIVPOL is to gather information for report from the areas listed below :

1) Prisons

- a) The information should indicate if it is functioning or not;
- b) Overcrowding and living conditions;
- c) Number of persons detained;
- d) Maintenance of records;
- e) Legal period of custody;
- f) Expedient investigation of accusation

2) Gendarmerie

How effective is the gendarmerie ?

- a) Number of police working;
- b) Complaints against police;
- c) Number of crimes under investigation;
- d) Means/Limitations of Communication;
- e) Ability to respond to situation;
- f) Relations with people.

3) Human Rights Abuses

Are abuses to Human Rights occurring :

- a) Illegal/irregular arrests;
- b) Instances of torture;
- c) Deliberate inhuman conditions.

CONCLUSION

Given the comment that has been made and the relevance of areas A and B and CIVPOL Major targets, CIVPOL monitoring teams in the prefecture in particular and operations, must ensure that their activities and information reporting falls within the parameters enumerated above. This piece must be strictly observed and to serve as reference point.

Best regards.
