(c) Number of contacts found positive	—	/	—	/	—	—
(d) Remarks						

7. TUBERCULOSIS CONTROL

- (a) Number of arrested cases 1 active cases none discovered during month.
- (b) Number of arrested cases 7 active cases none retained in camp.
- (c) Number of cases sent to sanatorium during month none
- (d) Number of persons, including contacts, examined clinically 1 fluoroscopy —
radiography 1 laboratory —
- (e) Remarks All inact. t.b.c. are retained in camp, given double ration calcium injection, vit. and treatment.

8. SANITATION

- (a) Condition of kitchens good Food storage satisfactory
- (b) Weekly health examination of kitchen personnel performed —
- (c) Latrines
- (i) cleanliness satisfactory
- (ii) adequacy good
- (iii) flyproof —
- (d) Water supply (answer once only or if supply is changed)
- (i) source good
- (ii) adequacy good
- (iii) potability good
- (d) Quarters
- (i) cleanliness good (ii) estimated degree of crowding good
- (iii) lousiness none (iv) vermin —
- (v) dusting of people and quarters performed twice a month
- (f) Garbage and refuse disposal: frequency 2 a week method main. town
- (g) General cleanliness of camp grounds improving
- (h) Remarks Control of individual kitchen

9. BRIEF NARRATIVE REPORT OF HEALTH EDUCATION ACTIVITIES IN THE VARIOUS FIELDS OF HYGIENE AND SANITATION AND NURSING

Frequent inspection of living quarters, kitchens and lavatories.
Instructions in hygiene and sanitation given.

10. NUTRITION. DIET COMPOSITION AND SUPPLEMENTARY RATIONS FOR SELECTED GROUPS. INCLUDING CHILDREN:

- 1) Inact.t.b.c. cases given double ration and milk.
- 2) Old and peer physical condition given milk and maltine
- 3) Children under 16 years given milk.
- 4) Expect. mothers given milk.

11. NUMBER OF DOCTORS, TRAINED NURSES, NURSE-AIDES, DENTISTS AND OTHER MEDICAL PERSONNEL SERVING IN UNRRA HOSPITALS, INFIRMARIES AND CLINICS:

(a) UNRRA		(b) DPs	
(i)	doctors <u>1</u>	(i)	doctors <u>-</u>

UNRRA Medical Officer

¹⁾ Patient - days during month

A patient-day is that period of service rendered a patient between the census-taking hours of two successive days, the day of discharge being counted as a day of care only if the patient had been both admitted and discharged the same day. The American Hospital Association's instruction is as follows:

Formula for calculation for each calendar day: Midnight census plus number of admissions and births during the succeeding 24 hours, including in admissions the number of patients who were both admitted and discharged (or died) the same day. For patients both admitted and discharged between one daily census and another, a day of care is counted if the patient is admitted, occupies a hospital bed and has a hospital chart originated. Exclude stillbirths from all counts of patient-days.

²⁾ Clinic visits

An out-patient for whom a clinic visit should be counted is an individual registered for and receiving service in the clinic or dispensary who does not occupy a regular bed or bassinet in the hospital.

This report does not require a count of different individuals served, although the clinic administrator may wish to keep such a record for his own use.

A clinic visit is the occasion of treatment, diagnosis, immunisation or any other personal professional service to an out-patient in any subdivision of the clinic.

If the clinic, dispensary or out-patient department is organized in several departments or "clinics," such as a heart clinic or a maternity clinic, each of which keeps a record of patient visits, the clinic administrator may wish to keep a record for his own use of visits to the several departments. A report in such detail is not required on this form. The total number of clinic visits to be reported, therefore, may be either the sum of patient visits to several separate departments, or an unduplicated count of visits to the clinic as a whole if records are kept for such a count.

.....388.....

14 - TOTAL NUMBER OF COMPLETED IMMUNIZATIONS UNDER UNRRA DIRECTION DURING THE MONTH215.....

15 - TOTAL NUMBER OF CHILD HEALTH EXAMINATIONS DURING THE MONTH 31.....

OBSERVATIONS AND SUGGESTIONS - TO INCLUDE NOTE ON IMPORTANT DEFICIENCIES IN DRUGS AND EQUIPMENT We required urine testing apparatus, breast pump, vagine speculum.

D.P. Acting Health Officer

C. Coghlan
UNRRA Nurse
Catherine Coghlan

W. J. V.
UNRRA Medical Officer
Dr. W. J. ZUREK

¹Patient-days during month

A patient-day is that period of service rendered a patient between the census-taking hours of two successive days, the day of discharge being counted as a day of care only if the patient had been both admitted and discharged the same day. The American Hospital Association's instruction is as follows:

Formula for calculation for each calendar day: Midnight census plus number of admissions and births during the succeeding 24 hours, including in admissions the number of patients who were both admitted and discharged (or died) the same day. For patients both admitted and discharged between one daily census and another, a day of care is counted if the patient is admitted, occupies a hospital bed and has a hospital chart originated. Exclude stillbirths from all counts of patient-days.

²Clinic Visits

An out-patient for whom a clinic visit should be counted is an individual registered for and receiving service in the clinic or dispensary who does not occupy a regular bed or bassinet in the hospital.

This report does not require a count of different individuals served although the clinic administrator may wish to keep such a record for his own use.

A clinic visit is the occasion of treatment, diagnosis, immunisation or any other personal professional service to an out-patient in any subdivision of the clinic.

If the clinic, dispensary or out-patient department is organized in several departments or "Clinics", such as a heart clinic or maternity clinic, each of which keeps a record of patient visits, the clinic administrator may wish to keep a record for his own use of visits to several departments. A report in such detail is not required on this form. The total number of clinic visits to be reported, therefore, may be either the sum of patient visits to several separate departments, or an unduplicated count of visits to the clinic as a whole if records are kept for such a count.
