INFO: MILOB GP HQ /ZEN

FROM: SECT 3 HQ GITARAMA

DATE: 16 JAN 95

SUBJECT: RPA TROOP DEPLOYMENTS

1. RPA info requested in your fax of 13 Jan follows. Please note that this info is tentative as we have not developed a complete Int picture. Given the high level of RPA security and their general suspicion of UNAMIR, it will take some time to develop an accurate deployment report.

3. BUTARE SUB-SECTOR (info not avail at this time due to comms problem; will forward asp in morning)

4. A deliberate effort will be made over the next few weeks to confirm the above information and to develop it fully however, please be aware that a certain degree of discretion is required and this adds to the time needed to gather and cross check info. Those

positions above showing 4 figure grid references only will be given priority. We do not have reliable info on the allocation of platoons to companies and have only sketchy info on which company responds to which battalion. The info gathering process is further complicated by the fact that 305 Brigade extends as far west as Kibuye. It is not known if other brigades may extend into our area.

MEMORANDUM

TO: UNAMIR HQ/COS

INFO: IOC
HAC

FROM: SECTOR 3 GITARAMA

SUBJECT: ORCS/OP RETOUR

1. On 24 Feb, a meeting was held at Sector HQ to discuss the status of the four ORCs in the Gitarama prefecture. In attendance were reps from UNHCR, UNREO, HUMAN RIGHTS, WLF, and UNAMIR.
2. The concept of ORCs has not really worked out in this sub-sector. Seldom, if ever, do returnees stop longer than the time it takes to be registered. Moreover, in three of four target communes, IDPs are registered at the Commune Centre rather than the ORC. Finally, we now seem to have reached a point at which the current ORCs have outlived whatever usefulness they had.
3. In Masango commune, the ORC is so far from the Commune centre that it is not used for registration. The Bourgmestre refused to agree to a location closer than that selected. He believes that there are less than 2,000 IDPs from his commune left in the camps. We have delivered fewer than 50 persons via Op Retour transport while more than 6,000 have returned home on their own. The camps from which they came, Rukondo and Cyaneka, are now closed. There seems no point in continuing to operate this ORC and the resources could be used elsewhere. It was agreed that this ORC should close immediately.
4. In Murama commune, the ORC has received fewer than 50 persons via Op Retour transport while approx 3,500 have returned home on foot. The bulk of them were from the Rukondo and Cyaneka. The Bourgmestre believes that fewer than 3,000 IDPs from his commune are left in the camps in the south but thinks that few of these will come home voluntarily because of their involvement in the massacres. The ORC is too far from the Commune centre to be useful and can not be moved closer because of the Bourgmestre. It was agreed that the Murama ORC should be closed immediately.
5. In Kigoma commune, the ORC has processed more than 700 IDPs and appeared, until just recently to be working well. In the last few days, there have been persistent complaints of a hidden prison that is part of a deliberate effort to harrass and intimidate returnees. The existence of this prison was confirmed on 25 Feb. This prison is allegedly used to torture and selectively kill some persons before they are registered as prisoners. Until this matter is sorted out, the continued operation of the ORC is not considered wise as the local authorities are deliberately duping us. While it was agreed at the conference to continue operation of this ORC for

the time being, the new evidence gathered on 25 Feb argues against this. It is recommended that the Kigoma ORC be closed immediately.

6. In Ntongwe commune, the ORC has never been used though Op Retur has delivered over 800 IDPs to the commune. The Commune centre is used for registration and, the few times that it has been necessary to accomodate IDPs over night, they have stayed in the Commune centre. Malicoy has a platoon stationed here and there is no plan to move it. The security situation in this commune has been worisome for several months with unconfirmed allegations of hidden prisons and intimidation. The Bourgmestre of this commune lost his entire family in the massacre along with 12,000 other members of the commune. Reconciliation is not high on his list of priorities. While it was agreed at the conference to continue operating this ORC for the time being, there are several good reasons for not doing so. The main one is the attitude of the Bourgmestre. Although there were a large number of persons from this commune living in the camps, this commune was not a good choice for a target of Op Retour because of the deep feelings of fear and vengeance abroad there.

7. The overall security situation in Gitaram Prefecture is ominous. The prison is a disgrace to Human Rights and there are an increasing number of indications that the local authorities have used Op Retour as a means of getting their hands on more of those they want to punish. There are also a growing number of indications that a large number of persons are being falsely arrested and have no hope of justice in the foreseeable future. Finally, though the harvest has been relatively good for those who were able to get crops in the ground, the overall conditions in the communes are still worrisome. A much more focussed humanitarian effort is required if conditions are to improve. It is strongly suggested that Op Retour be suspended until a better security climate and more humanitarian assistance can be obtained for those whom Op Retour is trying to bring home. In the interim, permission is requested to close the ORCs in this sub-sector and to consider placing the resources elsewhere.
