PERSONNEL RELATIONSHIPS

They are not really collaborators ~~dirrictly~~ strictly speaking. However, the intelligence gathered is obtained because of personnel acquaintance during social conversations, ~~which~~ are of excellent quality, because they are ~~spontaneously transmitted~~ resulting from mutual interest. The ~~informer~~ person taking part in conversation is not preoccupied by the ~~executives~~ profession. The informer is a person who accepts to ~~furnish~~ give information to the general intelligence gathering to ~~help them~~ assist in accomplishing their mission of information the agent is an informer ~~more~~ who is qualified, ~~used searching or the accomplishing clandestine activities~~. This is generally done by special ~~services~~.

The informer or agent is mainly responsible of collecting information especially those ~~kept inscret~~, He is generally recruited according to his ability and his position in society. ~~or the plan of action in the area where they want to get information.~~
The informer can be obliged to deal with his service because of different reasons:

- Patriotism, civism, the love of Public order.
- Religions convictions, political conviction,
- Reward of gain
- Implication in ~~compromitting~~ affairs
- Spontaneous offer without compensation

Let us keep in mind that the interest is the most protocol used by the agents.
Because of this the state provides him ~~judiciously used~~ amounts of money that must be accounted for legal.
The procedures of recruit and of using manipulation, the informer will be studied later.

TECHNICAL MEANS

The are installations or technical process used either to collect, either to stock information or for their treatment.
The usage of there methods requires sometimes the help of experts who are progressively included among the service personnets it has irreplaceable advantages according to discretion, promptness, accuracy, convenience of the information.
The main technic actually used are:

- The photography
- The audio-visual
- The sonorous recording , Telephone listenings (tracking)
- The radio
- The satellites, the plans are used like inputs in the explication of several technique(photography, phone ~~tapping~~ bugging)

a) THE PHOTOGRAPHY

It is extremely important, in meeting, procession, strikes on public roadway, to subsequently identify speakers, listeners or strikers, and to eventually confuse a bad participant.
Watching from a long distance can be realized buy using telephoto leus machines.On the other hand photo machines miniaturized that can be easily concealed are used in the counter espionage for the spinning teams or to cover the strikers.

b) THE AUDIO-VISUAL

The video camera has replaced the cinema.The advantage of video film is capital in case of strike with a grave disorder.It offers the possibility to revive the event.
Because of slow moving and (picture stoping) techniques, the audio-visual allows to analyze the scanning circumstances.
A video camera well hidden can cover secretive meeting. The surveillance Camera allows to watch continuously a well precised point.

c) THE REPROGRAPHY

It has replaced the typing and even the photocopy for the fast reproduction and in larger number of documents. It is used in all branches of a service of General Intelligence gathering, especially at archives.

d) SONOROUS RECORDING

The tape recorder can be used during public meeting or private for opimon to conserve a conversation that took place in an office, a beefing (report) from an informer in any area.

e) PHONE LISTINGS

It is a technique based on the interception of telephone communication.
Technically speaking, it doesn't present any major difficulties. But it does on juridical point of view.
This procedure doesn't have any legal value in front of the justice and it is even accused to be illegal as an attack to private life and to secretive correspondences.
It is also the something for the mail control.Their utilization must not only be motivated for the attack to the state safety or the struggle against big criminality.They can also be used on demand of instruction's judge.

f) THE RADIO

It is used fr executives of General Intelligence gathering to cove political demonstrations of all orders(electoral results for ex.). It is very important during the surveillance operation, to assure the lank between teams, between a team members in case of broken spinning, to facilitate the relay and the continuity of operations.

g) DATA PROCESSING

The data processing has invaded the intelligence gathering domain. Computers allow to store enormous quantities of information on diskettes. Moreover, they offer the advantage of reducing considerably the time of searching the information. The use of Data processing in Intelligence gathering field has became nowadays a primordial necessity for every intelligence gathering service.

a) To be objective: This means frank and impartial the agent must avoid two mistakes that can be heavy and cause bad consequences:

*To present an opinion that is personnel as being representative of the reality. To present some fact and day supposed conform to government desires.

b) To be enlightened

It has to be replaced in its scope and matched, because of work and the knowledge of the executive of the analysis

c) Be complete

This means that the executive must report everything he knows, precessing, if necessary, the limits of his information.

d) To be verified or crosschecked:

An executive of intelligence gathering can not afford a denial (to make a mistake)

e) It must be planning

It is necessary to draw the meaning, to precise the perspectives, to lead up to the short or mean term prediction. The knowledge of previous facts is over interesting neither the retrospective analysis, but I especially during an agitated period, the aspect of reach must always be oriented towards the evolution

f) To aim the efficiency

It must lead up on the action and not on the philosophical analysis. It must be matched for the practical propositions need to encounter the situation.

g) To be quickly transmitted

The fact is fundamental because an outdated information has a mediocre (poor) value, and nothing can be quickly depreciated like the information.

REMARKS(comments)

The worst is always possible when the information is filtered or stopped, therefore the authorities will only receive cut down or falsified information. They will under estimate from now and on, the reality and the state risks to failure or the adventures. The decisions will not match the needs and the desires.
The state credit will crumble away and its authority will degrade. The fate of a regime essentially cares about the value of information and its sources.

GENERAL INTELLIGENCE GATHERING

**LESSON NO 4.**

INTELLIGENCE GATHERING TREATMENT

Plan: the collect (gathering)
the tri
the crosschecking
the analyze.

If taken technically, the information can be considered as a simple knowledge of a certain fact. From this point of view this is the raw material, the first ingredient of the work of general intelligence gathering.

On contrary, intelligence gathering covers a more precise knowledge and less popular. It is an aspect(side) of the truth that is more less known.
To obtain the information that is a knowledge more rich and precise, the informer must pass by different stages that we can call the treatment cycle.This includes:

1. THE COLLECT

It is the very first stage during which the executive gathers the information coming from different sources. It gives priority to the exploitation of material sources that are m[illegible] easily accessible.

2. THE TRI

It is the stage of classifying information received from the agent. He does it according to criterion depending on the nature of the problem. Sometimes the agent will keep in minds the substance of the information interesting the inquiry.

3. THE CROSSCHECKING

That is the more important stage of the treatment process. It is verifying the authenticity of the information received. The agent can do it by comparison or by using complementary information, more precise, when he can ask his informer or other information sources.

4. THE ANALYZE

It is the last stage of the process. It is an intellectual work by which the executive uses his own knowledge to seize thereat interest of subject. The information obtained this way must posses the following qualities:

Objet:Activity of the main syndicate of Working people of RWANDA (CESTRAR)

Mr NSABIMANA Claude General Secretary of CESTRAR AND Delegate of this main office to PANAFRICAN of LUSAKA (9-1-95) left Kigali by the regular flight Ethiopian Airlines the 6th of this month around 9h p.m.
Some syndicate's people went to the Airport along with Mr NSABIMANA, and one of them is Mr NKUSI Peter, a School Director of the Center. An other is GASANA Callixte who is an employee of the Bank of Kigali.

The first hand information let people think that this trip may be the preparation of employees'strike, to make a pressure on Government.

Adressees

-EMGN
-Prefect of Kigali
---

Remark

This document will be completed by "an information note, when the invistigator team will be able for Instance:
-to know who paid Nsabimana's trip
-to establish why this person has been delegated by his main office
-to determine the reasons and modalities of the action planned by the employees.

INTELLIGENCE OF IDENTITY

NSABIMANA Claude
Known

Intelligence on archives (File)

Has adhered to National syndicate of the Public administration in June 1981.
Was elected as General Secretary of the above organisation on November 12,1982 and as General Secretary of CESTRAR since January 10,1984.
Since he was appointed to his position, he made sure that he is supported by his friend and school coleague of the same promotion and whose name is NKUSI peter.

Proper Intelligence case

Mr NSABIMANA Claude who left Kigali for LUSAKA via Nairobi the 6th of this month, had a round trip ticket, issued by Ethiopian Airlines, and ordered by the Panafrican confederacy of Workers, which was the Congress Organizer.
Nsabimana carried with him a friendship message on behalf of the CESTRAR, to the participants at the Congress(see attached copy).
He also had a copy of the minutes of the meeting held on january 4, during which the syndicate's main office decided to adhere to the Panafrican Confederacy of workers, to indicate his representative at Lusaka's assizes.

In the same meeting they elected the General Secretary in transit in Nairobi, to meet his Kenyan Collegue to work out on tightening the relationship between the two main offices, Rwandese and Kenyan.
Before his boarding, the trade-main leader told his friends that when he comes back, the CESTRAR will decide to organize a strike with the main goal to force the Government to immediately approuve the agreement signed with the syndicate, this agreement is relative to increase workers'salaries up to 30% .
An other well known information, from a good sources, let us think that all syndicates composing the CESTRAR will associate themselves to this action.

TYPE OF INFORMATION NOTE CONCERNING ECONOMICAL PROBLEM

N°...../SRS
Date.....

Origin.....
Source.....
Value .....

Objet: Shortage of maize and Bean on the Northern region's Market

A discomfort is taking place in the three districts of the northern region (Gisenyi, Ruhengeri and Byumba) where the procurement of these two basic products becomes a problem because of the increasing in security . If these difficulties have been overcame until now because of Oprovia's last stocks; it seems that it won't be the same thing,especially now,since this public organization of regulation doesn't have enough means and funds to get going again.

In fact,inspite of commitment made by the Chamber of Commerce of Gisenyi in December, to supply Oprovia, the merchants of the northern region hampered by a lack of money and the insecurity are incapable to make enough stocks for their future survival,during the seasonal collecting. As matter of fact, presentely the maize and bean are seriously rare on market of the region and prices are prohibitive, eventually annoying Consumers.

Fore those who are amazed by the deficiency,the merchants resort that it is impossible to get normaly supplies because the insecurity and that producers accept to sell to private people, only for an unofficial price superior to the one set by the taxation decree.
This s: ation may perturb people's walfare if emergency measure are not taken to assure the normal supplying of maize and bean to the three northern distric's consumers.
Everybody regret unanimonsly the nom-operationality of Oprovia in their region.
Besides, Gisenyi and Ruhengeri are the main garret(granary) of the country, so the consequences may go beyond limits in the region.

III. EXPLOITATION OF INFORMATION.

The search of information could have limited interest if it could be transmited to people able to know it by the fostest and secrest ways in order to allow themselves to exploit it and therefore to act.
The addresses of information are in number of two:
-at National scale (grade):The Minister
-at local scale :The prefect.

Once the information is gathered and treated by the inquire team, these autorities can encounter defferent situation.
-The information supplied is completed enough and sufficiently verified to build up rightway the concerned authority and to allow him to properly take useful measures (authorization,interdiction to strike,warning expulsion).

-The information can be judged too frogmentary (sketchy) or not enough verified to the point the addresses will need additional information. He will if necessary, carry on more precise investigation before deciding.
-The reported facts do not represent any interest for the actual context, however they can be related to other facts indicated during different times and different places.
-It is the information main office's responsability to do the chronological assembly,the Consistant synthetis of those events in order to draw their true meaning for the centralized Power.
-The reported facts do not justify particular decision . In this case, after contributing to arouse the authorities attentionm on certain problems, notes and reports are simply classified at the archives while waiting for that a new fact may pring a subsequent while waiting for that a new fact may pring a subsequent interest which is unsuspected today.

TRANSMISSION OF INFORMATION

The normal mean of transmission between the managerial services of information and authorities is the information note or the note of intelligence.
Nevertheless, according to the complex nature and urgent character of certain matters, it can happen that these matters be reported by phone to authorities. These phones reports are always followed by the information note or the note of intelligence. In this particular case the telephone conversation must be protected.
As for the transmission of information among people who collect them if we refer ourselves to model of the exploitation of information that we have studied previously, we can retain that the succes of work carried on is facilitated by the quickness of communication, and by verifications.

These communication are carried by messages, short writting meant to provoke decision making or urgent operations(surveillance, shadowing)
We distinguish different types of messages according to their method of transmission :

-The message by carrier (messanger)
-The telephonic message, to which we can add the message by Fax.
-The teletype message
-The Radio message

It can be coded, camouflaged or clear (obvious)
The messages are speed up means of transmiting the information which in any case must be confirmed and precised by the information note.

To conclude, we cannot afford not to mention that those who gather and take advantage of the information will face difficulties to get a balance between a good quality of information (confidentiality,precision , concision,and exhaustiveness), and the quick transmission.
These contradictions will be smoothed away by the perceptiveness of intelligence agents who must watch the protection system of communication means.

The addresses

As recalled above, the intelligence is an information means of the Government, it is obvious that their production be first addressed to the higher level, and to the Minister (of Interior, of Defense or of National Security ,according to the Country ). But the Public Powers are not limited to those authorities and the Prefecture intelligence services alone, they can normaly inform the E M G N or they can instruct the above powers to inform the local representative of the law enforcement: Prefect Sub-prefect and so on. This collaboration can be fruitful because it allows RG employee to tight interpersonal relations in all administrations , at the sometime this collaboration makes it quick in case of making urgent decisions.

Exemple of classical exploitation of R.G. information.

The data

On February 1st 1995, the border post RG Gisenyi indicates by phone to S.R.S-EMGN at Kigali, that to Commercial agents entered the territory and their names Paul Kwame and Mukele. They were carrying ordinary passeports bearing lseveral visas, among which, one was a transit visa for staying in Rwanda for 5 days. This visa has been delivered by the General Consul of Rwanda in Kinshasa.
The responsible of the border Post of Gisenyi emphasizes that Kwame and Mukele were received on their arrival by the local section's General Secretary of Carriers'trade Union . The General Secretary took them in his own ca and drove toward Kibuye which is the Capital city of the prefecture, where 800 miners oxtract gold for a foreign Company that export ingots to Europe.

Gisenyi adds that an information note in detail will be sent by next mail but the RG Post of Kibuye has been noticed by phone about this fact.

THE DILIGENCES

At the Central (EMGN)LEVEL

The S R S affluent of these first information, carries on searches as a matter of routine in archives of the service,and it appears that the two strangers,Mukele and Kwame are known as members of Director Comitee of the international trad-Union (FSI), important syndicate organisation with the program that covers suspecious political activities.

The S R S:

-Indicates the facts to the Minister of National Defense
-Informs by coded message the cheif of the information antena of Kibuye about syndicate ties (connection) of Mukele and Kwame asking him to watch over their contacts
-Warms by identical message all other posts of information on the

territory.

18

At the antena's lever.

On February 2nd, the RG employee on duty in Kibuye,informs the EMGN, by the EMGN, by coded message, that the two strangers'activities who arrived a day ago from Gisenyi were closely being watched. It is abvious that Mukele and Kwame had a long talks with the General Secretary of National trade Union's miners and with Carriers's trade union's one, both residing in Kibuye. According to a well aknowledged informer, Kwame and Mukele made on effort to convince these two syndicates to stop working since the first march until there will be some changes. The claim regarding miners salaries was not satisfactory before that date. The two representative of FSI were gone again toward Butare on February 2 around 10h o' clock by bus belonging to ONATRACOM Cie.

The R.G. Employee of Kibuye adds that the prefect and his colleague of BUTARE have been noticed and that an information note detail will follow.

2.On February 3rd 1995, the SRS receives a new message from RG Gendarmerie on duty at Butare where the petroleum company resupplying the gold mine in fuel is located .
He indicates that on their arrival the 2nd in evening coming from Kibuye, Kwame and Mukele went to pay a visite to the local leader of petroleum trade-union to convince him as they did for carriers, to accept the principal of the solidarity strike during the stoppage planed by miners the 1st march 1995. The petroleum representives giving up to their oxhortations ' s finally given his agreement.
Mukele and Kwame should catch the Sabena flight the same evening at 23h, to their mutual countries .
Once again the authorities (prefect of Butare and srs-EGMN0 were informed without delay.

3.On February 4th,1995 the Kigali airport security (RG antena) confirms the departure of Mukele and Kwame and indicates that there was no sign of suspicion.

The sythesis

When he received by regural mail, the detailed notes announced by Gisenyi, Kibuye, Butare and Kanombe's antenas, the EGMN wrote to the Central Power, a synthesis of observations made by these three posts about the trip made by Mr Mukele and Kwame ,and drew a definitive concusion that a menace of an inspeding and generalized strike is almost evident among the three important categories of workers of the country: the miners, the road carriers and the petroleum. Is put in evidence in this matter the perfect articulation of connection that must exist.

- On one hand between the antenas of RG and their Head Quarter
- On the other hand between the antenas themselves.
- Besides between the E M G N and the representatives of the Centralized Power at different levels(Minister of Defense,

the Prefects).

19

We will observe:

-That because of circomstances that surrounded their entrance in Rwanda, the Gisenyi antena didn't omit to his homologous of Kibuye, the arrival of Mukele and Kwame.
-That hapy initiative allowed to identify immediately the two commercial agents,as really syndicalist leaders, probably in mission.

That at the sometime, he proceeded to a warning broadcasting, Mukele and Kwame were constantly watched by intelligence services from the time they crossed the border.

-That consequently the true motive of their trip (provocation of social desorder, with the goal of compromising the gold export that procures devises to Rwanda) was quickly established.

-That knowing their goals and what they were up to in Kibuye and in Butare as well, allows now the centralized power to take the measures required by the situation; eventual intervention to miners' employers in order to speed up the consideration of their claim, possibility of boosting(or relauncling) the labor Inspection, direct contact with workers representatives menace of requisition and so on..)

-That trully, the centralized power,duly informed as it has happened since the beginning of this matter, can never be under informed in order to avoid the crisis wanted by the FSI agents.

-That it is again his responsibility, subsequently to invite his diplomatie representitives and his consulars to refuse from now and on,granting visa of stay or of transit to Kwame and Mukele.

OBJECT.

Candidacy of Mr Kayumba Jules at Butare for the competitive examination of judiciary Police inspectors
Ref: Letter n0 035 of december 15,1994 of Mr the Minister of Interior

Supporting Documents.
a file of three documents

Introduction

I have the honnor to report the inquiry carried on and the information gathered on behalf of Mr Kayumba Jules 25 years old, married, one child, employee of Commerce, residing 25,CHURCH Avenue in Butare , who demanded the authorization to participate at the next judiciary inspector's recruiting that will take place on june 8,1995.

Marita status

Nationality

Mr Kayumba Jules was born on january 7,1970 at Remera in Nyakabanda commune, from Eugene Nkubito and Murekatete Immaculée. He is Rwandese citizen and catholic. His father who is a merchant of fabric in Kigali (Nyamirambo) for morethan 25 years. His mother is a house keeper and lives in family .

Education

He did his studies at the elementary school of Nyamirambo, then his father registered him at the boarding school at the Lycee Rugunga where he obtained his high school Diploma in 1989.

Military Service

Registered on census list of Nyarugenge, Kayumba was recognized fit for the military service, but he has never been called in.

Mariage

He got married on April 6,1990 at the mayoralty(towncouncil) of Butare with Miss Twahirwa Berthe that he met at lycee, and who now's a school teacher at the catholic elementary school of Butare.
From this marriage a boy named Pierre was born in 1991.

Employement

From the time he finished his studies,Jules has first worked with his father, then because of his education, he got a job as an executive with APPROVIA's agence, where he always works.

Political and trade-union's activities

Kayumba doesn't participate to any political or trade-union's activity. At the office, he always refused to follow his trade-union 's freinds. On contrarly he is a competent organiser and devoted,having practiced a lot of soccer (football) when he was still in Lycée .

Financial situation

He lives in villa that he bought with the state financing and he is paying regularly. Kayumba's family is very well respected among teachers and business people.
Being a very economical, Kayumba doesn't have any debt.
With his wife they only leave on their salaries. They don't have any other source of Income.

The inquest's opinion .

To conclude, according to good information gathered, i consider that a favourable response will be reserved to Kayumba's application who in addition never had a Gendarmerie or a police record.

LESSON V.

The security and the secret Protection.

Plan

1.Generalities
2.Consciousness-RAISING
3.General measures
4.Remarks.

Generalities.

The nature of intelligence gathering antena is based on secret, therefore, better than ordinary Gendarmerie's Brigade,

it is depository of secretive documents, confidential information, diverse technical materials, and besides all of these, arms and munitions that must be protected eveentual instrusion or otheir risks. 24

The archives of G.I. service can be coveted. The measures to be taken to make these archives invulnerable to any risk can change according to the nature and circumstances of Post.

2.The Consciousness-raising.

The first measure is to educate and make the personnel be sensitive to how important is the security, by lecturing, precise instructions and frequent reminding, including exercisings suited to risk situations.

The General measures

The General measures of security and protection, valuable for all antena of intelligence gathering concerning especilly:

a.The buildings.

They must be isolated compared to neighbouring buildings or with comonwalls: Fances well closed,windows with wire fencing,security service.

The night lighting around the building is very important.
The quard service must do patrols at irregular intervals.
They very often use surveilling cameros to make the access to building more secure, it is the samething for the most sensitive parts buildings. The means of defense against the fire are to be verified p odicaly.

B. The archives.

There is a way of protecting them particularly against fire, the theft and the indiscretions.
The secretive documents and the files concerning the informers are normaly kept in safe, sealed inside the office of the service chief, The above safe can be watched by surveilling camera and equiped with darm sustem.
The otheir documents kept in archives'room,files and masterfiles must be inside metallic furnature that can be closed by a key.
After working hours, it is necessary to make sure there is nothing left on desks, nor files,notes,rough copies, nor service stamps.
At the end of the day, all rough copies, carbons and papers thrown in the waste paper baskets, they are to be incinerated.

The frequent usage of computers has contributed to minimize spaces that archives were occupying and to better secure them.

C.The foreign personnel at work.

If it is necessary to recruit some employees, outside of the Gendarmerie, typist,laborer, in charge of maintenance,diverse

contractuals. This must be done by a meticulous inquest focussing on morality loyality toward institutions.

d.The transmissions.

The security of secretive and confidential transmissions or communications is a part of the interior regulation.
The principal (basis) is the coding to be used during variable periods. These codes are v ery secretive documents and they must be protected.
They are kept in safe while they are not being used. Besides the superviser, only two otheir people can handle them.

The coded and secretive messages are sent by telex or by Fax. The coders must destroy immediately after usage, the rough copies that have served to transcribe(to carry out),to code, to decode the message. There will be no case when the clear message and the coded message can be kept, juxtaposed in the same archives.
A very simple code can be used to comouflage the last names (family names) in phone communication . These codes must be also protected against any disclosure. In any case the phone conversations must be short and strictly minimized.

e.Professionnal secret.

Each Gendarm knows that he must keep the professionnal secret and that violation to this rule will be punished by the Penal code (art.48 p.c.).

Pratically, thaughtless chattering, very oftnen unconscious, during personnal relationship, correspondents, the informers, the journalists, the parents ect.
The intelligence system must be constantly aware of evantual indiscrectness during which it can be disclosed.

Remark.

Concerning National Defense, the scientific or technical discoveries must be strictly protected . It is in this domaine where the "CLASSIFICATION" is used as the very first measure of auto-protection of a document.
In fact, the classification allows to determine the degree of confidentiality of document and consequently, the number and categories of people who are capable of knowing its content.

The protected documents are classified into three categories:

4.1. The restricted diffusion

It is stamped on documents that have to be handled by administrative exercice's executives,or the executives of a sensitive enterprise.
The above documents can never be display (posted). They can not either be reproduced without the authorization of the service

supervisor or of the enterprise where he comes from.

26

4.2. The confidential

In a sensitive enterprise, or on administrative service of state,a confidential document must be handled by executives who need to use it for strict professionnal reasons.
The confidential documents are kept in archives and their consultation is allowed by interne organization.
Generally, the officer willing to consult a classified documents in file must apply in writing . This application is aimed by his supervisor. The time of the document removal, he fills out a form of his name, his job, the dates, the time of removal and of restoration.
In case of flight or loss, these information will make it easier for the search.

4.3. The secret, very secret or secret defense.

The handling, the preservation and the move of all secret documents require strict measures. The original of these documents are numbered. They can never for any reason be duplicated.

Handling:

People who must handle these documents will be ceted by name dtermined by their function . They will require an outhorization inquest(inquest of deep morality extended to loyality) sometimes extended to their immediate environment.(spouse, parents-in law,freinds etc).

Preservation

The documents having a secret stamp are kept in safe placed in secured area.
The safe can be equiped with an alarm system or placed under camera surveillance in case of necessity.

Move

The move of a secret document is generally assured by a security officer or a team .
Exemple:
The coded documents are handed to their users (or consultants) inside or within diplomatie representations outside of the country because of their special missions.
Sometimes, inside the country the courrier of secret documents is escorted by a motorcylist during the peace time and by armed people during the crisis time.

Exemple of a secret document:

The coded documents, very secret documents.
Military operations'plans or other intervention plans
-Formula or plans of discovery in the scientific fields or technical fields.
-Information in the nuclear field.

LESSON VI. ORGANIZATION OF AN INTELLIGENCE GATHERING SERVICE.

The I.G. are within the Gendarmerie, and they form a service that must inform and acknowledge the Government so it can act quickly to maintain the order .
The mission is supposed to be simply and efficiently structure. This is generally composed by:

-A supervision responsible of coordinating the set of all service actions,of centralizing the informations, of analyzing them then of synthetazing because the justaposition of several facts is insuficient: It is necessary to get a teaching from it, even a prediction

-The provision must also direct the services'actions which are its subsidiary.

-Exterior services, usually called regional,or mobile brigades, sometimes prefectural services or departmental, post or again antenas. They are allocated on the whole terrtory and their competence either one or several sub-prefectures. The exterior services can count posts at land borders, water borders or in the sensitive zones. When exterior services are insuficient or nonexistant, the gendarmerie brigades carry on the attributions devoted to information in specializing if necess a highier ranked sub-officer or a subsidiary officer and gendarme for that task.

UNITED NATIONS NATIONS UNIES

**CIVPOL**

**UNAMIR - MINUAR**

**TO:** CIVPOL-Commissioner Col.'Diarra' CIVPOL HQ KIGALI

**FROM:** CIVPOL OPERATIONS CPOO R. Bastian

**DATE:** 06.09.1995

**RE:** **EVACUATION PLAN**

---

Please find attached evacuation plan for CIVPOL/RWANDA.
The plan considers three types of evacuation Low medium and high.

A copy of this plan will be supplied to each monitoring team in the Prefectures, as well as a copy will be supplied to Operations - HQ.

**EVACUATION PLAN FOR CIVPOL RWANDA**

1. Table of contents
2. Foreword
3. UNAMIR correlation list of alerts Military / Civpol
4. LOW Evacuation
5. Medium Evacuation
6. High Evacuation
7. Tasks for all staff members
8. Monitors personal emergency evacuation equipment list
9. Evacuation teams
10. Monitor's addresses and phone numbers
11. Map sketch over Kigali area

ALL MONITOR'S SHOULD HAVE UPDATED INVENTORY LIST OF PRIVATELY OWNED FURNITURE, VALUABLES, HOUSEHOLD EFFECTS, AUTOMOBILES ETC.

THIS INVENTORY IS NECESSARY FOR ANY SUBSEQUENT CLAIMS FOR LOSS OR DAMAGES.

Regards.

Rolf Bastian

**FOREWORD**

Due to the security plan for UNAMIR Sector Kigali, each CIVPOL member is required to be prepared to evacuate the mission area at short notice.

To ensure that evacuation will be performed as safety as possible and without delay or confusion, every police monitor **must** familiarize themselves with this plan and be prepared to evacuate as quickly as possible.

It is possible that the evacuation actions may first be taken by CIVPOL and it may not be consistent with the Military standing.

CIVPOL evacuation plan considers three types:

1. **Stage 1 (low)** and
2. **Stage 2 (medium) and**
3. **Stage 3 (high)**

It is essential for every monitor to know, that according to the Military Security Plan in Sector is tasked to ensure physical security for CIVPOL monitors, interpreters, facilities and equipments in Rwanda area.

The Chain Of Command to pass the order of evacuation is:

1. **SECTOR CHIEF (PC)**
2. **STATION COMMANDER (DPC)**
3. **MONITORS (CPMT/PMT)**

**UNAMIR CORRELATION LIST OF ALERTS MILITARY / CIVPOL**

The following codes signifying the various stages prior to evacuation which will be used by CIVPOL.

THROUGH: Col W.J. Fletcher
DCOS Sp

SUBJECT: FAREWELL DINNER TO MGEN CG TOUSIGNANT: UNAMIR FORCE COMMANDER

There will be an official farewell dinner party at 7.30 pm on Thursday 14 December 1995 at Chez Lando Hotel to bid farewell to MGen CG Tousignant, FC before his final departure from the mission.

All staff officers on duty are requested to attend the dinner. All UNAMIR civilian members desirous of attending the dinner are requested to give their names to Maj Bill Sundman G3 ( Air) {X- 11148} along with the contributory amount of USD 20.00 each (to cover food USD 12.00, drinks USD 3.00 and gift for the FC USD 5.00). SO Admin is requested to provide the names of all staff officers who will be present on 14 Dec 95 to the G3 ( Air).

The tentative schedule for the dinner party is as follows:

| | | |
|---|---|---|
| 7.30pm | - 8.15 pm: | Drinks (at Little Hut/Downstairs) |
| 8.30pm | - 1000 pm: | Dinner (at Chinese Restaurant/Upstairs) |
| 1000pm | - 1015 pm: | Speech & Presentations |

Dinner will be buffet with free seating except for the guest table.

The following facilities are also requested for the duration of the party:

a. Jazz Band (to be placed downstairs) - Ghanaian Band.

b. Security: Perimeter Patrol (2X6) - INDBATT.

c. Traffic Control and Parking - MP Coy.

All staff members are requested to cooperate and submit their names and USD 20.00 per head not later than 08 Dec to Maj Bill Sundman G3 ( Air ) at Amahoro Room No 1024 to enable him to organise the event.

Thank you for your cooperation.

**TO :** *See Distribution List* **DATE:** *17/8/1995*

**FROM:** *CIVPOL Commissioner* **REF.:** *CIVPOL/MEMO/685/95*

**SUBJECT:** *Repatriation of Mali, Nigeria and Ghana CIVPOL Observers*

*1. In reference to my memo CIVPOL/MEMO/679/95 dated 15 August, 1995, please find attached the names of CIVPOL Observers from the above mentioned countries to be repatriated to their home country on 2nd, 3rd and 10th September, 1995 respectively after completing their tour of duty with UNAMIR.*

*2. They have all been informed and served with a copy each of the clearance certificate for necessary action.*

*3. The Finance Section and Travel office are requested to take necessary action relating to their final payment/claims and travel arrangements respectively.*

*4. There is an exception in the case of Ghana CIVPOL as they may likely travel direct from Kigali to Ghana with a UN chattered Ghanaian Airline carrying the last batch of Ghanaian troops on 10th September 1995.*

*5. Regards.*

# INTER OFFICE MEMORANDUM

27 Aug 95

**TO:** Mr D. Stuckless, CAA 5

**INFO:** Mr C. Ouziel, CAO
Mr W. Clive, CISS
Ms L. Rafii, SRSG Legal Advisor
Mr M. Ncube, C BOI

**FROM:** G. Brière, CCM

**SUBJECT:** PX PRICES

1. As you are aware, we have put a lot of pressure on Angelica to review, amongst other things, their pricing policy in order that their prices be in line with the price list in the contract they signed with us.

2. Angelica did indeed take the steps to modify the prices for the items listed in the contract. However, I am still receiving many complaints of UNAMIR personnel saying that several items are too expensive compared to the prices they can find on the local market. One complaint which I received quite often also is that the prices of some items were changing many times.

3. This issue was discussed with your predecessor, Mr J. Parnell, on several occasions and I asked him to investigate. So far, Mr Parnell did not have the time to take actions as he had many other urgent issues to address. However, this problem can not wait any longer to be examined.

4. Therefore, the PX Committee must be formed ASAP in order to examine this matter. This Committee should have a representative of every UNAMIR Components and will act as the Chairman. This Committee should be similar to the one for the Catering contract and in fact could be composed of the same members.

5. The Committee will need to: survey the local market in order to see the prices of the items sold there, open Angelica books to examine their cost prices, see what are their profit margins,etc. Angelica Director, Mr A. Raykundalia, should also be invited by the Committee to explain his pricing policy. The Committee will then have to examine the whole issue and to formulate their recommandations to me. I will then sent my recommandations to the CAO for his approval.

6. The Committee report should be completed and forwarded to my attention by 16 Sept 95. I would like to meet with you before you start this project to give you the details of the different complaints which were made to me in the past few weeks.

*RE: Prior notice to cancel the rent agreement for the premises you occupy.*

*Dear Sir,*

*On August 16th 1995, when I submitted to you the Préfet of Kigali's authorisation to rent my mother's house situated in KIGALI REMERA I PLOT 2285 in which you are now staying, I have, in your office, given to you a fifteen days prior notice in order for you to hand over to me the above mentionned premises which are legally under my managment.*

*Fifteen days later, to my inconvenience, sir, you failed to honour both the notice and your own promise to leave the premises on september 1st 1995. Yet, until this day, I still have not received any satisfactory reply.*

*No need to say, sir, that your failure to hand over my mother's property at the agreed time is highly costing me, disorganising and undermining other planned projects (some important contracts have just been cancelled).*

*However, sir, just as a last gesture of clemency: I offer you a new and last prior notice. In addition, you are just to be charged the agreement's usual monthly rent for this month of september during which, against my will, you are still using the premises.*

*Through the following notice, I ignore, in fact, the August 16th 1995 prior notice.*

***PRIOR NOTICE OF TAKING OVER THE PREMISES ON PLOT 2285 IN KIGALI REMERA-I***

*Major Effiong BASSEY, Provided both my mother Nélida MUKAMURIGO's power of attorney and the PREFET of KIGALI CITY's authorisation to rent the premises situated in the above mentionned plot, I, the undersigned Jean-Paul MAHORO, hereby certify the present document as a prior notice to take over the above mentionned house along with all items, including furnitures, confided to you, sir, on October 24th 1994 when you first entered the premises.*

*As a reminder, please note that your monthly rent for September has not yet been collected.*

*The present notice offers you, sir, not more than fifteen (15) days from the reception date, to hand the above mentionned premises over to my care.*

*Sincerely,*
*Jean-Paul MAHORO*

|---|---|
| OUTGOING FAX NUMBER. | DATE: 19 September 1995 |
| TO: Ms. Susan Matthew<br>Chief Administrative Officer<br>UNAMIR, Kigali<br><br>INFO: Mr P. McNeill, CFO | FROM: Amir A. Dossal<br>Chief, Finance Management and<br>Support Service, FALD/OPS, DPKO<br>UNHQ, NEW YORK |
| FAX NUMBER. 963-3090 | FAX NUMBER: (212) 963-0642 |
| NUMBER OF TRANSMITTED PAGES: 4 | FILE REFERENCE FIN.MIR/95-176 |
| SUBJECT: UNAMIR performance report - request for additional information | |

Please find below excerpts from a note presented to FALD by the Peace-Keeping Financing Division, DPPBA in connection with the field submission of the performance report. (Please note that we have already extracted those questions relating to Headquarters' activities.) As discussed with the Chief Finance Officer during his visit to New York, your assistance in providing additional information for the following areas will assist us in finalizing the financing report for UNAMIR which must be submitted to the Advisory Committee by early October, 1995. Excerpts follow:

Military observers:

Travel costs -- Deployment schedule shows fewer milobs deployed during the period. How many were emplaced/rotated? Were travel rates on target?

Clothing and equipment allowance -- Based on actual deployment, we should have a savings of only about $800 under this heading. Field shows an overrun of $6,750.

| | |
|---|---|
| Drafted by: GS/gts - Room 2145D | Authorized by: Amir A. Dossal |

cc: (GTS) C:\wp60\unamir\misc.mir

Many contingents:

Deployment - We had told ACABQ that the authorized level of 5,500 uld be reached by 15 April 1995, but actual deployment was 5,537 by 15 ril; then went up to 5,617 by 15 May and stayed at 5,614 by 9 June. How n we explain the delay in reaching the authorized level?

Daily allowance -- Based on actual person-days, I show an expenditure $ $1,302,900 (overrun of $500). This item should tie in directly to no. f person-days.

Emplacement, rotation and repatriation -- how many troops were rotated ring this period?

Rations -- what was the average cost per person per day?
How did the breakdown by rations element, transportation and water ork out?

Welfare - FALD (and Field) are showing more savings than my alculations based on person-days). Can we explain?
MLD/Field savings = $192,900; mine = $26,800.

Meal and accommodation allowance -- We will probably be criticized for aving a very large number of staff officers on board. Need to know which ontingent the Military Police Company/Force Engineering Company belonged o. Also, where were they stationed and what were they doing that they did ot have access to contingent rations?

ther costs pertaining to contingents:

Contingent-owned equipment - They are going to ask for a complete isting of APCs in UNAMIR, so let's have this information ready. Did we ; the 11 APCs budgeted for? And, did we continue to lease the 50 tracked PCs?

Death and disability -- What are the total numbers for KIA and WIA to ate?

ivilian police:

Travel costs -- Field has provided actual deployment. However, since ewer civpol deployed, why the overrun on travel?
w many were rotated during this period?

ternationals and local staff:

Was the assumption of 40% of international staff being provided with commodation correct?

---

*Dear Sir*

*I'm very sorry that I can't hand over you this urgent answer myself and even to late for the certain reason.. The POO Capt Klingler is assisting me with this writing. At the moment and as you know we are living together in the german house in Gikondo. At the moment I'm still sick. I went to the doctor already. I'm looking forward to join you very soon at the Headquarters.*
*The following answers to the missing details about the UMAMIR Vehicle during the time of my sickness.*

*- On the 8. september 1995 Capt Klingler has driven me to my resident in Gikondo and taken the car back to the office. He needed this car to deliver the Sitreps and to come home after he finished his work and also to go the following day to the briefing in Amahoro.*

*- After the 9. september 1995 Capt Klingler parked the car inside the garage of our house and went to Nairobi to get his necessary injection until the 15.september 1995. At that time nobody of us have been told what happen with the car while we are on CTO or on Leave or in the case of Sickness. Therefor we decided to park the car as mention before at a very safe place in the looked garage. Later on I realized that the crew from Ruhengeri School has taken the car at the weekend and driven up to the School, thinking that we wouldn't need the vehicle during this time .*

*Unfortunately we also realized that we have done a other unknown case about the needed sign to take the CTO and the Leave. But in this case neither we german than the swiss contingent haven't gotten any instructions..*

*For your understanding in this cases I thank you in the name of all the handicapped colleagues.*

*Regards.*

I'm looking forward to join you very soon at the Headquarters.*
*The following answers to the missing details about the UMAMIR Vehicle during the time of my sickness.*

*- On the 8. ~~August~~ Sept. 1995 Capt Klingler has driven me to my resident in Gikondo and taken the car back to the office. He needed this car to deliver the Sitreps and to come home after he finished his work and also to go the following day to the briefing in Amahoro.*

*- After the 9. August 1995 Capt Klingler parked the car inside the garage of our house and went to Nairobi to get his necessary injection until the 15. August 1995. At that time nobody of us have been told what happen with the car while we are on CTO or on Leave or in the case of Sickness. Therefor we decided to park the car as mention before at a very safe place in the looked garage. Later on I realized that the crew from Ruhengeri School has taken the car at the weekend and driven up to the School, thinking that we wouldn't need the vehicle during this time .*

*Unfortunately we also realized that we have done a other unknown case about the needed sign to take the CTO and the Leave. But in this case neither we german than the swiss contingent haven't gotten any instructions..*

*For your understanding in this cases I thank you in the name of all the handicapped colleagues.*

*Regards.*

*R. Bastian*
