Have had meetings today with Candau WHO and Davies WMO. Both Candau and Davies agree that operational services in the Congo should gradually be handed over to the Government of that country.

WHO proposal is that by the end of the first quarter of 1964 the 168 doctors we now employ should be reduced to 120 and to 60 in 1965 and to zero in 1966. It is expected that 55 Congolese doctors trained by us in France and Switzerland will be returning to the Congo by the end of November 1963, another 50 will also complete their studies in November 1964 and 25 in November 1965. It is also envisaged that the Congolese may obtain more doctors under bilateral assistance.

Candau told me that during his recent visit to the Congo he got the authorities of Lovanium University to agree to increase their output of Congolese doctors and he is very hopeful that this will be done.

Steps are also being taken to seek bilateral aid for the Medical School of the University of Elisabethville which together with

.../...

the Lovanium should be able to train within the Congo all the doctors the Congo will need. As to advisory services Candau does not anticipate any legal difficulties regarding the termination of the contracts of the experts concerned. He can reduce at any time the number of the advisers who are now serving in the Congo.

The Committee of the WMO consider 1963 as the peak year of operations and suggest the gradual replacement of their experts by Congolese. Their main concern now will be to investigate how best they can utilise the services of the Congolese they have trained during the last $2\frac{1}{2}$ years. The head of mission in the Congo has already been asked to investigate and report on this matter and to prepare a special fund project for the training of Congolese. WMO agree that there should be a reduction this year in the number of operational and advisory posts. They will let me have their detailed proposals.

Met Sarwate, deputy secretarygeneral ITU this afternoon to discuss future of ITU congoprogramme. ITU hope to be able to withdraw their operational personnel at the end of the year and to concentrate on advisory and training programmes. They propose to allow for a 4 to 6 months phasing out period after december 1963. They anticipate considerable progress in the training of congolese and will complete their planning and implementation of the internal telecommunications network before the end of the year. They expect at the end of november 1963 the return of about 55 congolese technicians now receiving training in Europe and have a programme for the intensification of the training abroad of some more congolese. France, Germany and Switzerland have been offering bilateral assistance for the training programme.

We have to explore ways and means of helping the congolese to finance their advisory services and training programmes for which the ITU is now responsible.

My thinking is that the congolese should be asked to take over the entire programme at the end of this year. ITU programme in the Congo, as you know, has been one of our most successfull programmes and I do not envisage any difficulties should the congolese be asked to assume responsibility for the programme.

Was informed by ILO this morning that FAO is negotiating with Belgium recruitment of 63 agricultural experts for the Congo. ILO are naturally very peeved because they feel that FAO appears to have shelved rural integration programme for Congo agreed to by UN, FAO, ILO and UNESCO in Rome last January.

Am very disturbed by FAO action and will mention matter to Sen in Rome on thursday. If Belgians are to be recruited for agricultural programme it seems to me that the congolese should ask for them from Belgium. UN funds will not be used for payment of salaries of the belgian experts. I do not know if belgian mission is aware of negotiations and would like you to investigate and cable back.

I agree with you and Ahmed that the estimates from FAO far exceed what we agreed to and I will also discuss this matter with Sen on thursday. I also discussed the future of the ILO programme in the Congo with Morse who has asked for time to consider the points raised by me. Will give you more details later.

Have received cabled request from Bunche to arrange suitable contract and briefing for Taramarce as chief of investigation team and Saubertin as assistant in connexion with investigation into death of Madame Dister in Katanga. Will proceed with detailed arrangements as soon as possible. In order permit appropriate responses to questions from nominees will appreciate your advice by return on following points: timing and duration of investigation; responsible supervisor of investigation and manner in which complete briefing and work assignments will be handled; anticipated method of work of investigation team; type of report required; methods to be used in interviewing witnesses; facilities available to team in Katanga including transport, office assistance, local police cooperation and so forth; extent and coverage of investigations already undertaken; plus any other information you consider essential or useful for initial briefing here prior to departure. I regret that we have almost no information here on this case and will therefore depend on you for full information to permit us to respond to questions from these nominees and to give them necessary information to permit initial steps to be taken.
