Gaza's battle against the Zionist blatant aggression for the defense of self, property and home, is a legitimate right and a sacred mission ensured by all religions, laws and common sense. They bravely and courageously resisting the Zionist aggression as well as the international betrayal.

05/02/15

It has become exposed to the free peoples of the world those fabricated justifications for an Entity that has been using criminality and lying through history.

These flagrant scenes are the best proof of belittling the simplest Palestinian human rights and violating the charters and covenants, and surpass the international laws and norms.

The claim that this aggression has come as a result of irresponsible acts, is an unjust claim and ignorance of the case facts. In fact, it is standing with the aggressors and oppressors and lining up with the conspirators in their ditch.

The political hypocrisy must not be at the expense of the people. The States' interests could only be achieved under the security and stability of nations. "Together for Gaza" is our blessed campaign slogan to offer whatever support we can, to break the wall of fear and silence, and make the world aware of rights and duties.

We say to the Arab countries: Palestine is in the hearts of all peoples, it is an inherited sense generation after generation, offspring after offspring. The Palestinian case has been here to stay and it will be always present. The role of the Arabs must be stronger to reach the desired level of responsibility and the aspirations of the peoples. Also, our message to the all nations is that the Zionist entity will increase nothing but rupture and chaos in the world, and will achieve nothing but vile gains and cheap aspirations. Thus, the international justice must be achieved, as it is the slogan of the advanced civilizations and the developed nations.

Not only the Zionists have occupied Palestine without a right; not in a remote unknowns nor in a dark night, but in broad daylight, and the glare of the world and the United Nations, but also the Great Powers have taken international organizations as a ride and a mean to this occupation, and have made it as a maze where the oppressed rights have been lost.

Not only the United Nations has contributed by its negligence and taking the side of the occupier to keep up with aggressor and its associates, but also tried to force the victim, whose land has been usurped, family been scattered and sons been killed, to recognize the occupier, to abandon their legitimate right to resistance and to defend their rights, and pressured and lured neighbors of the victim as to be surrounded from all sides.

We would like the world to know that we have gathered here to affirm the legitimate demands of our brothers, represented in the following:

- 1- Lift the sinful aggression and its effects immediately, and provide reconstruction assistance.
- 2- Lift the brutal blockade, open the crossings, and carrying out the demands of the Palestinian people for a dignified life.
- 3- Accountability and prosecution of the Zionist entity for committing war crimes, as Israel is not above the international law nor above the human rights.

In conclusion, we hope that you deliver our message to the UN and the free world, also our just lining up with the oppressed people of Gaza.
