Dear Honorable Ban Ki-moon, Secretary General of the United Nations,

I support your organization and the commitment to improving the State of the world. Recently on the news, it was reported that by 2050 the amount of plastic in the sea will outweigh the number of fish living in it. Honorable Ban Ki-moon, may I present to you a recycling program I discuss in my book titled, "Sure up Your Funds". It's a go GREEN program that can be developed to raise funds for global warming research, a cure for cancer, AIDs, and other deadly diseases that don't have cures.

The recycling plan I am introducing, offers several benefits for hospitals, universities, corporate and small businesses across the United States and abroad. The paybacks are:

- A) It will help raise money for *global warming* initiatives, AIDs, and finding a cure for cancer
- B) It will reduce the amount of plastic being *discarded* in the sea
- C) It will help to save Corporations (domestic and foreign) millions of dollars
- D) It will provide benefits to the welfare of the American people and Foreigners worldwide
- E) It supports the Global Warming Initiative and will serve as a resource to humanity to raise money for various charities and research.

I speak passionately about this initiative because I believe it will help others. Enclosed for your review is a copy of the plan taken directly from my book, which was written to help disadvantaged groups in America today. I believe with your power and the marketing power of the United Nations, the recycling plan can ignite a program that can be used to help millions of people worldwide.

I salute you and the members of your task force. This is certainly a mission that benefits the people of this nation. Your organization's assistance is needed to help bring this initiative to fruition. Thank you for taking care of this problem for our country. You are truly appreciated. Please contact me at your earliest convenience.
